Aller Support*

Supercritical Whole Herb Technology
TheraVeda supplements combine the benefits of chemical-free herbal extracts and natural whole herbs through an innovative, patent-pending technology. Supercritical extraction is a gentle process for making powerful herbal combinations that contain the broadest spectrum of the herbs' essential nutrition. Our unique technology adds the therapeutically targeted supercritical extract to the broad-spectrum post-supercritical extract. The two are recombined with the whole herb and sealed in a vegetarian capsule. TheraVeda supplements achieve the broad spectrum now combined with a concentrated, therapeutic herbal extract formula.*

TheraVeda's Ajay Aller Support Formula was based upon traditional formulations dating back thousands of years. As an herbal addition to your health program, Ajay may help support proper histamine levels and respiratory function.*

Organix-South's TheraVeda™ vegetarian capsules contain NO corn, soy, salt, yeast, sugar, wheat, egg or dairy products and are formulated without the use of preservatives, artificial flavors or colors. Our premium vegetarian capsules are prepared without any chemical solvents and are independently verified to be free of pesticides and harmful levels of heavy metal contaminants.

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

AYURVEDIC
WISDOM

Ajay, in the Indian language, means INVINCIBLE. What do sherpas guiding climbers up Mt. Everest, test pilots in airplanes, and people with stuffy noses have in common? Surprisingly, it's the need for good digestion. Ajay Aller Support combines the traditional lung tonics neem leaf and black pepper with traditional immune support herbs turmeric and coriander. These herbs support the digestive process, helping the body to maintain acceptable respiratory function.*

Traditionally, Ayurvedic masters have sought to support the body's immune system and restore balance by recommending beneficial herbs that help support respiratory function and normal levels of histamines. TheraVeda's Ajay Support blends the best of these herbs in the correct proportions for respiratory support. Coriander and turmeric have antioxidant actions known to support the lungs. Neem, with naturally occurring quercetin, acts in synergy with coriander and turmeric to cleanse and detoxify the body. Black pepper extract with piperene enhances the bioavailability of the constituents present in other herbs. For maximum benefit in difficult conditions, take Ajay Aller Support with Pavan Upper Respiratory Support.*

Supplement Facts

Serving size: 2 capsules
Serving per container: 30

Amount Per Serving	% Daily Value

THE ONLY SUPPLEMENT
PATENT PENDING
WHOLE HERB TECHNOLOGY

Anita, in ancient Sanskrit means GRACE. Pomegranate was once called the fruit of the gods. Women going through menopause may find pomegranate to be heaven-sent because its seeds contain the estrogens (estradiol, estrone, and estrin) the ovaries no longer produce. Pomegranate seed is one of the richest sources of the female hormone estrone. Animal-based estrones are often used to support the natural changes in menopause, but many women are reluctant to use them. Pomegranate may be an alternative to support the body as it passes through the normal stages of menopause.

Licorice provides useful isoflavonoids and helps the body conserve stimulant hormones. Ashwagandha supports circulation and brain balance, while tribulus may help a woman's brain respond to the minute traces of testosterone needed to maintain sexual desire. Anita's unique blend of high potency and safe extracts may help to balance the physical and emotional well-being of mature women.

Supercritical Whole Herb Technology
TheraVeda supplements combine the benefits of chemical-free herbal extracts and animal extracts through an innovative patent pending technology. Supercritical extraction is a gentle process for making powerful herbal concentrates that contain the broadest spectrum of the herb's essential nutrients. Our unique technology adds the therapeutically focused supercritical extracts to the broad spectrum, root-to-petiole extract. They are combined with the whole herb and sealed in a vegetarian capsule. TheraVeda supplements achieve the broad spectrum of actives normally available from whole herb supplements, but are combined with a concentrated, herbal extract.

TheraVeda's Anita Menopause was developed to support a woman's body during the normal changes of her life as her ovaries produce and decline, and she moves from premenopausal and menopausal phase. This transition is a natural time of hormonal, physiological, emotional and spiritual changes.

Organic herbs, TheraVeda's supercritical extracts, and other natural ingredients are used to create these products and are formulated through the patent pending, chemical-free, whole herb, supercritical extraction process. All extracts are processed within our facility, subject to our strict quality control and safety procedures and handled using our inner shell packaging.

Kama

Male Vitality
Formula™

Supercritical Whole Herb Technology

TheraVeda's supplements combine the benefits of chemical-free herbal extracts and natural whole herbs through an innovative, patent-pending technology. Supercritical extraction is a gentle process for making powerful herbal combinations that contain the broadest spectrum of the herb's essential nutrition. Our unique technology adds the therapeutically targeted supercritical extract to the broad spectrum post-supercritical extract. They are recombined with the whole herb in a vegetarian capsule. TheraVeda's supplements address the broad spectrum of natural products only available with whole herb supplements, but now with a potent herbal extract formula.

TheraVeda's Kama Male Vitality Formula was developed to enhance and reinvigorate the concentrated blend of herbs that help address mental distress, cardiovascular concerns, and energy.

Organic herbs of TheraVeda™ are grown in clean, fertile soil using natural fertilizers and pesticides. Only premium quality herbs are used. Our proprietary extraction process uses supercritical carbon dioxide to gently and effectively extract the essential nutrients of the herbs. The resulting extracts are combined with the whole herb to create a potent, natural, and effective whole herb supplement.

DIETARY SUPPLEMENT
PATENT PENDING
WHOLE HERB TECHNOLOGY

Kama is the Cupid of Indian mythology. Kama comes without warning to empower those worthy of falling in love. In Ayurveda, male potency is a distillation of all the energies taken into the body throughout a man's lifetime. Healthy energies engender potency. Our herbs support the energies that may have been lost through time or unhealthy lifestyles.™

Ashwaganda (*Withania somnifera*) is a traditional male energy tonic. Laboratory studies of this herb show that it may enhance the production of nitric oxide, which relaxes blood vessels and may enlarge the tissues they serve. *Tribulus terrestris* is Ayurveda's male enhancer, used in the same way as DHEA. *Mucuna pruriens* is included in formulas to enhance feelings of satisfaction. It may stimulate the brain's responsiveness to the male sex hormone testosterone and to the pleasure chemical dopamine. *Hugraphilla curiculata* contains mucilages to coat and support the reproductive tract. Fragrant saffron promotes the protective action of the other herbs.

WISDOM

Manish, in Hindu mythology, is the Lord of the Mind. Ayurveda has a detailed theory on three different states of the mind. The vatta state is influenced by suppressed emotions, too much alcohol, suppressing natural urges and an unbalanced diet. The pitta state is influenced by anger, heat, or eating bitter, salty, or acidic foods and is often characterized by the desire for anything cold. The kapha state is influenced by too much sleep, too many fatty foods - and by bingeing after coming off a diet.*

Herbal therapies support the balanced energies you need to feel good. *Eclipta alba*, also known as bhingaraj or bhingaraja, is traditionally indicated for various kinds of "energy excess." *Embilica officinalis*, also known as amla, contains ingredients that counteract the oxidative stress associated with various toxicities. Ginger is recommended often, especially to support digestive health. TheraVeda uses high potency beneficial extracts of these herbs to support your body and mind.*

Supplement Facts

Serving size: 2 capsules
Serving per container: 30

Amount Per Serving	% Daily Value
Eclipta alba (leaf) SCO2 extract (80:1) & 224 mg26 mg *	
Eclipta alba (leaf) PSE** hydrophilic extract (10:1)	224 mg.*

Nartana, in the Sanskrit language, means one who 'Makes to Dance.'

Boswellia serrata (know as "shallaki" in Ayurveda) is traditionally used to support proper joint function and mobility. *Gokharu (Tribulus terrestris)* is known to support soft tissues and maintain the growth of healthy bone tissues. *Tinospora cordifolia* is an adaptogen. It helps in balancing the total functions of the joints. Regular intake of ginger (*Zingiber officinale*), due to its warming action, is often used to support joint function. *Ashwagandha* increases circulation to the joints, and also acts as an antioxidant.*

Supercritical Whole Herb Technology
TheraVeda's supplements provide the benefits of both supercritical extracts and whole herbs in an innovative, patent-pending technology that uses no harmful chemical solvents. Supercritical extraction is a natural process that makes powerful herbal extracts containing the broadest spectrum of an herb's essential nutrients. Our unique technology concentrates the supercritical extract with the post-supercritical extract. This is then combined with the whole herb in a vegetarian capsule, achieving the broad spectrum previously only available with whole herb supplements, but now in a concentrated extract formula.*

TheraVeda's Sabara formula was developed to support a woman's body as she passes through the delicate phases of her active fertile period. The hormonal structural and functional changes produce the cycles of ovulation and menstruation. Through this stage, it is essential to maintain the integrity of her entire body's functions.*

OrganicSouth's TheraVeda™ vegetarian capsules contain NO corn, soy, milk, yeast, sugar, wheat, egg or dairy products and are formulated without the use of preservatives, artificial flavors or colors. Our premium vegetarian capsules are prepared without any chemical solvents and are independently verified to be free of pesticides and harmful levels of heavy metal contaminants.

Usha

Daytime Stress Formula*

Supercritical Whole Herb Technology

TheraVeda supplements combine the benefits of chemical-free herbal extracts and natural whole herbs through an innovative, patent-pending technology. Supercritical extraction is a gentle process for making powerful herbal combinations that contain the broadest spectrum of the herbs' essential nutrition. Our unique technology adds the therapeutically targeted supercritical extract to the broad-spectrum post-supercritical extract. The two are recombined with the whole herb and sealed in a vegetarian capsule. TheraVeda supplements achieve the broad spectrum of actions previously only available with whole herb supplements, but now combined with a concentrated herbal extract formula.*

TheraVeda's Usha Daytime Stress Formula was developed to assist your mind in maintaining concentration and focus, while pushing away distractions due to a stressful environment.*

Organix-South's TheraVeda™ vegetarian capsules contain NO corn, soy, salt, yeast, sugar, wheat, egg or dairy products and are formulated without the use of preservatives, artificial flavors or colors. Our premium vegetarian capsules are prepared without any chemical solvents and are independently verified to be free of pesticides and harmful levels of heavy metal contaminants.

*Usha, in the Indian language, means the DAWN. It is the time just before sunrise when the mind and body are fully rejuvenated. This formulation uses time-tested and proven herbs to help you maintain this state of mind throughout the day.**

Usha combines herbs traditionally prescribed for focus. Laboratory studies of *Withania somnifera*, also known as ashwagandha, show that it stimulates the production of nitric oxide. In the laboratory, nitric oxide is associated with the opening of blood vessels. *Asparagus racemosus*, also known as shatavari, is the ancient Ayurvedic directive for supporting digestion aggravated by stress. Both herbs are recommended for men and women who need to manage stress in their busy lives.*

For maximum benefit, take Usha Daytime Stress Formula with Nisha Night-time Stress Formula.

WISDOM

Vitay, in the Indian language, means VIGOR. In Ayurveda, the cause of all imbalance is due to a loss of "cellular intelligence." Certain cells have lost their capacity of healthy function and begin to operate in a survival mode at the expense of other cells in the body. The need for "cellular intelligence" remains to support healthy balance. Herbal therapies are not intended to replace modern treatments. They are intended to relieve stresses so that the cells untouched by treatments can retain their "cellular intelligence."™

Laboratory studies of ashwaganda (*Withania somnifera*) have shown that it stimulates the production of nitric oxide. In the laboratory, nitric oxide is associated with the opening of blood vessels and the activation of immune cells. Neem is thought to complement the immunostimulant and brain-balancing effects of ashwaganda. Turmeric, the yellow spice found in curry, is a potent source of antioxidants. Tinospora and ginger stimulate digestion, provide essential nutrition and help to keep food moving.

Supplement Facts

Serving size: 4 capsules
Serving per container: 25
