Re: Statements of Nutritional Support – Notification

Dear Dr. Tanner,

I am in receipt of your letter dated April 30, 1998 regarding a statement for a dietary supplement "Macroforce". You are pointing out that the statement

"Optimize your body's immune defense against day to day attacks"

suggests that "... it is intended to mitigate, treat, cure, or prevent a diseases, namely illness caused by pathogenic microorganisms".

Please, be advised that ImmuDyne will stop using the above claim. The new claim is:

"Optimize your body's normal immune defense."

Sincerely,

Leonid G. Ber
Chief Operating Officer
