Ingredients

Ingredients as defined by AAFCO.

Mixing Directions

Mix this Type B medicated feed with non-medicated feed ingredients to manufacture one ton of complete Type C medicated feed for cattle containing 10 – 30 grams lasalocid per ton.

The following table provides examples of mixing rates:

Type B lasalocid concentration (g/ton)	Type B per ton of Type C (lb)	Non-medicated feed per ton of Type C (lb)	Type C lasalocid concentration (g/ton)
100	200	1800	10
100	600	1400	30
1000	20	1980	10
1000	60	1940	30
20000	1	1999	10
20000	3	1997	30

The resulting Type C medicated feed should be fed continuously to provide not less than 100 mg or more than 360 mg of lasalocid sodium activity per head per day.

Caution

Feeding undiluted or mixing errors may result in an excess lasalocid concentration which could be fatal to cattle and sheep. Do not allow horses or other equines access to Type A articles or Type B feeds containing lasalocid as ingestion may be fatal. Safety of lasalocid for use in unapproved species has not been established.

Warning

A withdrawal period has not been established for this product in prerinuating calves. Do not use in calves to be processed for veal.
