Notification of Emergency Syringe Supply Interruption

Dear Valued Customer,

Pfizer Injectables is committed to providing information on supply so that appropriate contingency plans can be made to facilitate patient care and safety. This letter is to provide you with updated information on the supply status of our Emergency Syringes.

Due to manufacturing delays and increased demand, we expect to experience backorders on multiple presentations of Emergency Syringes. We understand the importance and critical nature of these products and are working to resolve these delays.

The manufacturing delay is impacting the Abboject™ Emergency Syringe production and although we are continuing to produce the ANSYR™ Emergency Syringes, we will not be able to cover the increased demand.

At this time, we do not expect any new Abboject™ Emergency Syringe shipments until June 2017. While limited supply of some ANSYR™ Emergency Syringes will continue to ship, we will continue to have backorders and will send allocated product to the wholesalers based on historical demand.

The products that are impacted are listed in the tables below.
