

Animal Matching Games

Name the Animal Group! Matching Game **3**

FDA's Center for Veterinary Medicine works hard to keep the CVM Animal Pals—and all animals—healthy. We make sure that the medicines used in pets and farm animals are safe and work the way they're supposed to. We also make sure that food for animals is safe and has the right ingredients, and that the food we get from some farm animals, like milk from cows and eggs from chickens, is safe for us to eat, too!

Help the CVM Animal Pals find their way home.

Match the animal below with the name of its group in the list to the right.

1. Shoal or School
