^a Guarantee required only when nutrient added except when the feed is intended, represented or serves as a principal source of the nutrient.
^b Sodium guarantee required only when total sodium exceeds that furnished by the maximum salt guarantee.

Ingredients

Ingredients as defined by AAFCO.

Mixing Directions

Mix this Type B medicated feed with non-medicated feed ingredients to manufacture one ton of Type C medicated feed for cattle.

The following table provides examples of mixing rates:

Type B lasalocid concentration (g/ton)	Type B per ton of Type C (lb)	Non-medicated feed per ton of Type C (lb)	Type C lasalocid concentration (g/ton)
100	600	1400	30
1000	120	1880	60
10000	20	1980	100
20000	100	1900	1000
80000	36	1964	1440

The resulting Type C medicated feed should be hand fed continuously at a rate of 1 mg lasalocid per 2.2 pounds of body weight per day (up to a maximum of 360 mg per head per day).

Caution

Feeding undiluted or mixing errors may result in an excess lasalocid concentration which could be fatal to cattle and sheep. Do not allow horses or other equines access to Type A articles or Type B feeds containing lasalocid as ingestion may be fatal. Safety of lasalocid for use in unapproved species has not been established.

Warning

A withdrawal period has not been established for this product in prerinuating calves. Do not use in calves to be processed for veal.

Manufactured by
Blue Bird Feed Mill
City, State, Zip

NET WEIGHT ON BAG OR BULK

*The final printed feed label should list only a single drug concentration
**Nutrient guarantees should conform to AAFCO recommendations for the intended breed or class of cattle
