CAUTION: Federal law restricts medicated feed containing this veterinary feed directive (VFD) drug to use by or on the order of a licensed veterinarian.

For reduction in the incidence of cervical lymphadenitis (jowl abscesses) caused by Group E Streptococci susceptible to chlortetracycline in swine.

**Active Drug Ingredient**

Chlortetracycline* ................................................................. 101 – 80,000 g/ton**

**Guaranteed Analysis**

- Crude Protein (Min) ........................................................................................... ___%
- Lysine (Min) ........................................................................................................... ___%
- Crude Fat (Min) ...................................................................................................... ___%
- Crude Fiber (Max) ................................................................................................. ___%
- Calcium (Min) ........................................................................................................ ___%
- Calcium (Max) ....................................................................................................... ___%
- Phosphorus (Min) ................................................................................................. ___%
- Salta (Min) .............................................................................................................. ___%
- Sali (Max) ............................................................................................................... ___%
- Sodiumb (Min) ....................................................................................................... ___%
- Sodiumb (Max) ....................................................................................................... ___%
- Seleniumc (Min) ................................................................................................... ___ppm or %
- Zincc (Min) ......................................................................................................... ___ppm or %

* Guarantee required only when nutrient added except when the feed is intended, represented or serves as a principal source of the nutrient.

b Sodium guarantee required only when total sodium exceeds that furnished by the maximum salt guarantee.

c Guarantee shall be stated in ppm when less than 10,000 ppm and in percentage when concentration is 10,000 ppm (1%) or greater.

**Ingredients**

Ingredients as defined by AAFCO.

**Mixing Directions**

Mix this Type B medicated feed with non-medicated feed ingredients to manufacture one ton of Type C medicated feed for swine containing 50 – 100 g chlortetracycline per ton.

The following table provides examples of mixing rates:

<table>
<thead>
<tr>
<th>Type B CTC Concentration (g/ton)</th>
<th>Type B per ton of Type C</th>
<th>Non-medicated feed per ton of Type C (lb)</th>
<th>Type C CTC concentration (g/ton)</th>
</tr>
</thead>
<tbody>
<tr>
<td>10,000 (5 g/lb)</td>
<td>10</td>
<td>1990</td>
<td>50</td>
</tr>
<tr>
<td>10,000 (5 g/lb)</td>
<td>20</td>
<td>1980</td>
<td>100</td>
</tr>
<tr>
<td>80,000 (40 g/lb)</td>
<td>1.25</td>
<td>1998.75</td>
<td>50</td>
</tr>
<tr>
<td>80,000 (40 g/lb)</td>
<td>2.5</td>
<td>1997.5</td>
<td>100</td>
</tr>
</tbody>
</table>

The resulting Type C medicated feed should be fed as the sole ration.

**Manufactured by**

Blue Bird Feed Mill
City, State, Zip

**NET WEIGHT ON BAG OR BULK**

*Deracin is the trade name of chlortetracycline hydrochloride formulation (Type A Medicated Article).

**The final printed feed label should list only a single drug concentration.*
