Good morning –

I can't specifically answer your question. In general, all drugs being administered under an IND protocol should be dispensed and administered by a qualified medical professional and guided by state and local laws where the research is being conducted. Please consult the state or country officials where the research is being conducted.

Kind regards,

Doreen M. Kezer, MSN
Senior Health Policy Analyst
Office of Good Clinical Practice
Office of the Commissioner, FDA

Subject: Hi

Hello Madam,

Regarding IV drug administration I have a question.

I understand, in United States hospital settings a registered nurse is required for IV drug start and stop service.

My question is, in a clinical trials involving IV drug, does a foreign medical graduate is eligible to perform these duties if delegated by PI?

In other words - Does anybody apart from a registered is eligible to perform these duties if delegated by PI.

Thanks
