SUPPLY UPDATE

Dear Customer,

Pfizer Injectables is committed to providing information on supply so that appropriate plans can be made to facilitate patient care and safety. We want to provide updated information on the supply status of the prefilled syringes containing Penicillin.

BICILLIN L-A

Pfizer continues to allocate product to the market weekly as outlined in the table. The July deliveries have been received and due to our supply improvements, we have increased the allocations to 100% of historical demand and we plan to keep this allocation in place until complete recovery in 4Q 2017. We continue to recommend consideration of prioritizing where BICILLIN L-A is the only choice for the patient's treatment. Please consider alternative drugs where clinically applicable.

Unit of Sale NDC	Presentation	Allocation % range (of normal demand)	Anticipated Next Delivery
60793-700-10	Pediatric 600,000 Units/1 mL PFS*	100%	August-17
60793-701-10	1,200,000 Units/2 mL PFS*	100%	August-17
60793-702-10	2,400,000 Units/4 mL PFS*	100%	September-17

*Prefilled Syringe

Trading partners placed BICILLIN L-A on allocation to help as many customers as possible have access to supply until the next anticipated product shipments arrive. Note that the allocation percent range may change. Please work with your trading partner on obtaining the product.

BICILLIN C-R

Pfizer expects to continue to allocate product as outlined in the table below until complete recovery is in place for all presentations which is estimated as 4Q 2017.

BICILLIN C-R:

Unit of Sale NDC	Presentation	Allocation % range (of normal demand)
60793-600-10	1,200,000 Units/2 mL PFS*	90%
