

How to download listing information from the FDA Unified Registration and Listing System (FURLS)/Device Registration and Listing Module (DRLM)

A registered medical device establishment is required to provide a registration or owner/operator number and listing number(s) to facilitate the shipment of the device into the United States. A firm's registration or owner/operator number can be found in the Public Registration and Listing database at <https://www.accessdata.fda.gov/scripts/cdrh/cfdocs/cfr/rl.cfm>. However, medical device listing number(s) are not available publicly. Medical device listing numbers can only be released to the owner/operator contact person or official correspondent of a registered establishment. The owner/operator contact person or official correspondent of a registered establishment may choose to download and share their listing information with Custom House Brokers or other parties to facilitate the shipment of their devices in the United States.

The owner/operator contact person or official correspondent should use the following instructions to download the listing information for their registered establishment:

- 1) Go to the FURLS login page found at <https://www.access.fda.gov/oa/>
- 2) Enter your account ID and password. Make sure that you have checked the "I understand" box, and then click the login button.

Login

Existing account holders, enter your account ID & password.

Click on this link to enter the Device Registration and Listing Module

4) In the menu, on the right hand side, click on the link titled “Download Your Listing Information”.

Medical Device Listings ▾

- Create Listings for Medical Devices
- Download Your Listing Information**
- Change, Deactivate, or Reactivate Listings
- Add/Replace Proprietary Names or Importers to Listings

5) Due to the amount of information that may be in a listing’s proprietary name section, downloads have been broken into 2 parts.

Download Listings/Proprietary Names

Click the Download Listings button to download all of your listing information, with the exception of the proprietary or brand names. Click the Download Proprietary Names to download all of the proprietary names identified for your listings. Both downloads create Excel files that you can save and search locally. The two files are cross-referenced by Listing Number.
