Making ACE Work for You: Importing FDA Regulated Products

OVERVIEW: ACE AND FDA

What is ACE?

The Automated Commercial Environment is a centralized system for all transactions related to imports and exports. Filers electronically submit all information related to an inbound shipment and the government processes the transaction systematically and sends status updates.

How ACE & PREDICT Work for FDA

* Data that is electronically validated may be automatically "May Proceeded"

FDA Current Status

- ACE became mandatory in June 2016
- Final Rule issued in November 2016
- FDA Supplemental Guide version 2.5 released February 2017
- FDA continues to work closely with importers, brokers, and software developers to ensure understanding and compliance of the “new” ACE process
- FDA also continues to collaborate with CBP to troubleshoot issues and make system enhancements

Data as of July 7, 2017

over
11.2M
entries

over
57.8M
lines

100
% filer participation

FDA Current Status

- Automated May Proceeds have increased in ACE, and the percentage of lines requiring manual review have decreased.
 - In 2014, only **26%** of (ACS) lines were Automated May Proceeds.
 - In 2016, (after full implementation of ACE and updates to FDA processing tools including line level release functionality), **62%** of lines were Automated May Proceeds.

FDA Current Status

- In ACE, FDA requests less documents.
 - In 2014, approximately **3%** of (ACS) lines needed additional information to make an admissibility decision (Documents Required).
 - In 2016, approximately **2%** of (ACE) lines needed additional information to make an admissibility decision (Documents Required).
- There were approximately **28,374 fewer** lines needing additional information to make an admissibility decision (Documents Required) in 2016 than in 2014.

Most Common CBP & FDA Rejects

CBP Rejects	FDA Rejects
<ul style="list-style-type: none"> Missing or Invalid Affirmations of Compliance 	<ul style="list-style-type: none"> Invalid Food Facility Registration Number – 27%
<ul style="list-style-type: none"> Missing or Invalid Entities 	<ul style="list-style-type: none"> Cancelled Food Facility Registration Number - 21%
<ul style="list-style-type: none"> Missing or Invalid Unit of Measure 	<ul style="list-style-type: none"> Invalid Product Code – 15%
<ul style="list-style-type: none"> Product Code Conflicts with Program 	<ul style="list-style-type: none"> Foreign UC/DP must be U.S. based
<ul style="list-style-type: none"> Missing or Invalid Source Type (Country Type) 	
<ul style="list-style-type: none"> Submitting UC instead of DP and vice versa 	

Common Data Errors

Areas for Improvement

- Must know the Intended Use Code of the product prior to transmitting entry data (foods do not require an IUC)
- Know required Entities and Affirmation of Compliance (AoC) Codes for commodity type
- Other than the few repeatable AoC codes listed in the SG, do not submit the same AoC code more than once per line
- Submit correct entity addresses and DUNS or FEI number

Common Data Errors

Consumer Use is different than Personal Use

- Base Code 130 For Consumer Use as a Non-Food Product
- Base Code 100 For Personal Use as a Non-Food Product
- Base Code 210 For Personal Use as Human Food

FD Flags

- **FD1** – Indicates that the article may be subject to FDA jurisdiction, including FDA review under 801(a) of the FD&C Act. For products not subject to FDA jurisdiction, a filer can "Disclaim" product from FDA notification requirements.
- **FD2** – Indicates that the article is under FDA jurisdiction and review of entry information by FDA under section 801(a) will take place. However, the article is not "food" for which prior notice information is required.
- **FD3** – Indicates that the article may be subject to prior notice under section 801(m) of the FD&C Act and 21 CFR Part1, subpart I. , e.g., the article has both food and non-food uses.
- **FD4** – Indicates that the article is "food" for which prior notice is required under section 801(m) of the FD&C Act and 21 CFR Part1, subpart I.

Final Rule

The [Final Rule](#) for submission of information to the Automated Commercial Environment (ACE) was published in the Federal Register on November 29, 2016.

Final Rule Changes

- **Optional** – Line Value
- **Optional** – Quantity and Unit of Measure
 - Except for Radiation Emitting Products subject to a Form FDA 2877, Declaration for Imported Electronic Products Subject to Radiation Control Standards and Prior Notice datasets
- **Mandatory** – Importer of Record contact information is required for all non-food lines
 - Although data elements may be optional, transmitting them may expedite processing •

Making ACE Work for You: Importing FDA Regulated Products

ANIMAL DRUGS & DEVICES

Submitting Animal Drug and Device Entries in ACE

- Know the Product Being Imported
- Information Needed for Submission
- Additional Resources

Know the Product Being Imported

FD&C Act defines “drug” as “articles intended for use in the diagnosis, cure, mitigation, treatment, or prevention of disease” and “articles (other than food) intended to affect the structure or any function of the body of man or other animals”.

A “new animal drug” means any drug intended for use for animals other than man, including any drug intended for use in animal feed but some exclusions do apply.

Animal/Veterinary medical devices

Know the Product Being Imported

Examples of animal drugs

- Penicillin G Benzathine
- Butorphanol Tartrate
- Gentamicin Sulfate
- Tetracycline and Monensin

Examples of devices for use on animals

- Immobilizer
- Scales
- X-ray systems
- Capnography and oxygen monitors

Information Needed for Submission Program & Processing Codes

Program Code for animal drug and device commodities is **VME**.

The **Processing Code** will be determined by the commodity sub-type:

PG01 - Government Agency Code	Commodity Type	PG01 - Government Agency Program Code	Commodity Sub-Type	PG01 - Government Agency Processing Code
FDA	Animal Drugs and Devices	VME	Animal Drugs	ADR
FDA	Animal Drugs and Devices	VME	Animal Devices	ADE

Information Needed for Submission

Product Code Overview

Structure of the FDA Product Code					
Position	1-2	3	4	5	6-7
Name	Industry Code (N)	Class Code (A)	Sub Class Code (A or "-")	Process Identification Code – PIC (A or "-")	Product (AN)
Legend: N – Numeric; A – Alphabetic; AN - Alphanumeric					

- FDA Product Code errors are among the most common reasons for FDA Entry Rejections.
- Use a valid FDA Product Code per the FDA Product Code Builder.

Information Needed for Submission

Product Codes

- Product code is mandatory.

PG01: Program Code & Commodity	PG01: Processing Code & Commodity Subtype	PG02: Industry Code
VME - Animal Drug or Device*	ADR - Animal Drug	54, 56, 60, 61, 62, 63, 64, 65, 66 or 67
	ADE - Animal Device	68

*Subject to additional rules based on FDA Program/Processing/Product codes. See PG02 in individual chapters of the Supplemental guide.

Information Needed for Submission

Product Descriptions, Packaging and Condition

Data Requirement	Animal Drugs and Devices
Commodity Characteristic Description	Mandatory
Quantity and Packaging* (if entered, the rules from the SG must be followed)	Optional but encouraged
PGA Line Value	Optional but highly encouraged

* See [FDA Supplemental Guide for ACE v2.5](#) for valid units of measure for Animal Drug and Device Packaging Containers.

Information Needed for Submission

Intended Use Codes and Affirmations of Compliance

- Intended Use Code is mandatory for animal drugs (VME/ADR).
- Affirmation of Compliance requirements depend on the Intended Use Code.

Intended Use Codes	Import Scenario	Affirmations of Compliance
085.003	Drug subject of a new animal drug application, conditionally approved application, or Index listing	Mandatory: REG, NDC, and VAN, or VNA Optional: VFL, VFD
100.000	Importation for Personal Use	
150.013	Active Pharmaceutical Ingredient / Bulk Drug Substance to be used for Pharmacy Compounding	Mandatory: REG, NDC
150.020	Active Pharmaceutical Ingredient / Bulk Drug Substance used to be further manufactured into a finished drug subject of a new animal drug application, conditionally approved application, or Index listing	Mandatory: REG, NDC, and VAN, or VNA

Information Needed for Submission

Intended Use Codes and Affirmations of Compliance

- Intended Use Code is mandatory for animal drugs (VME/ADR).
- Affirmation of Compliance requirements depend on the Intended Use Code.

Intended Use Codes	Import Scenario	Affirmations of Compliance
180.009	For research and development in a pharmaceutical product – clinical investigations in animals (INAD)	Mandatory: VIN
180.018	For research and development in a pharmaceutical product – for tests in-vitro or in laboratory research animals.	Optional: VIN
920.000	US Goods Returned	
970.000	Import for Export	
980.000	For Other Use: (APIs or Finished Drugs not elsewhere classified)	Mandatory: REG, NDC Optional: VAN, VNA, VFL, VFD

Information Needed for Submission

Entities

Entity Role (Code)	Entity Name	Entity Address	Individual Name, Tel# and eMail
Manufacturer (MF)	Mandatory	Mandatory	
Shipper (DEQ)	Mandatory	Mandatory	
FDA Importer (FD1)	Mandatory	Mandatory	Mandatory
Delivered to Party (DP)	Mandatory	Mandatory	
Producer (GD)	Optional	Optional	
Filer's/Broker's Point of Contact (PK)	Optional but encouraged	Optional but encouraged	Optional but encouraged

- DUNS and FEI are optional, but encouraged.

Information Needed for Submission

Origin and Arrival

Data Requirement	Animal Drugs and Devices
Country of Production or Country of Source	Mandatory
Country of Refusal	Mandatory if refused by other country(-ies)
Anticipated Arrival Date	Mandatory
Anticipated Arrival Time	Mandatory
Anticipated Port of Entry	Optional

Summary

- Know the product being imported and associated requirements
- Understand the data elements
- Provided correct and accurate information
- Give Entry Filers the information they need
- Obtain all necessary information from the Importer

NOTE: FDA will not be able to process an entry without this information. You can help expedite FDA's review of your imported product(s) by initially providing accurate and complete information and by responding quickly to requests from FDA for additional documents or information.

Additional Resources

- For more general information about animal drug and device products, visit <https://www.fda.gov/AnimalVeterinary/default.htm>

Making ACE Work for You: Importing FDA Regulated Products

INFORMATION AND RESOURCES FOR ALL FDA REGULATED PRODUCTS

Avoiding Delays with FDA

- Delays occur when:
 - Inaccurate information such as incorrect product code are submitted
 - Intended Use Code qualifier “UNK” (Unknown)
- To expedite FDA review:
 - All information provided should be complete and accurate
 - Provide **conditional data elements** if applicable to the product being declared
 - Provide **optional data elements** such as:
 - FEI and/or DUNS
 - Quantity and Unit of Measure

Use the FDA Supplemental Guide

- Review each of the PG records until all required information is understood and has been provided by the importer
- Each section identifies:
 - mandatory, optional, and conditional data elements
 - codes and code descriptions
 - length/class (syntax) for data element types
- Follow any instructions provided by your software vendor to ensure all data elements are entered for transmission.

Summary

- Know the product being imported and associated requirements
- Understand the data elements
- Provided correct and accurate information
- Give Entry Filers the information they need
- Obtain all necessary information from the Importer

Frequently Asked Question

Q: If I transmit an FDA entry, does ACE allow me to correct the data if I realize I made a mistake?

A: When CBP receives an entry, it will automatically send the entry to FDA to process in real time if the entry is within five days of arrival. Unless CBP or FDA rejected the entry, no corrections can be made. If CBP or FDA did reject your entry, work with your ABI representative to send a correction.

Frequently Asked Question

Q: When does FDA receive the entry data from CBP? I have had an “FDA Review Message” for several days.

A: Once the entry is accepted by CBP, CBP sends out a generic message that says “DATA UNDER PGA REVIEW.” This is not a confirmation that the data was sent to FDA. CBP will only send the entry to FDA, if the transmitted arrival date is within five days. If it is more than five days out, CBP will wait until it is within that timeframe to send it to FDA.

If it is within five days of arrival and you have not received any FDA response **within your usual turnaround time**, contact FDA’s ACE Help Desk at ACE_Support@fda.hhs.gov and your CBP Client Representative.

Frequently Asked Question

Q: Does FDA prefer DUNS or FEI numbers for entity identification codes (PG19)?

A: FEI and DUNS are optional, but encouraged.

Note: As of 5/30/2017, the DUNS will be required for the FSVP importer for each line entry of food, unless they are subject to exemption and/or modified requirements. For additional information, visit

<https://www.fda.gov/Food/NewsEvents/ConstituentUpdates/ucm549668.htm>.

Frequently Asked Questions

Q: Is the Drug Registration number an FEI number?

A: The Drug Registration Number (REG) is the 9-digit DUNS number the firm has on file with FDA Center for Drugs, Evaluation, and Research (CDER) Drug Registration (eDRLS). Only those DUNS numbers on file with eDRLS are Drug Registration Numbers (REG).

These can be found at on the **Drug Firm Registration Lookup** webpage:

<http://www.accessdata.fda.gov/scripts/cder/drls/default.cfm>

Frequently Asked Question

Q: Why can't I see the status of my entry in ITACS? Why does it say "FDA entry status information is not available pending receipt of conveyance arrival notification" when the shipment has arrived?

A: CBP is not consistently sending arrival notifications to FDA upon arrival of a shipment. Without receipt of that notification, ITACS will display the above message. This does not affect the ability to submit documents, submit availability information, or FDA's ability to review the entry.

Reference: CSMS #16-001003

Frequently Asked Question

Q: What are the lessons learned for how ACE changed filing for FDA?

A: Communicate early and often about FDA requirements. (Importer, Broker, and Software Vendor).

Delays and rejects occur when inaccurate information is provided, such as invalid product code or an unknown intended use code.

Use FDA as a resource. Attend webinars or request a training session. We are here to help.

Frequently Asked Questions

Q: Is “UNK” (Unknown) still allowed as an Intended Use Code?

A: UNK is still allowed as an Intended Use Code when the IUC is mandatory. If “UNK” is declared, CBP will not reject the entry if Affirmations of Compliance are not provided.

FDA highly encourages the transmission of complete data, including the correct Intended Use Code and Affirmations of Compliance. Refer to the FDA Supplemental Guide for a full list of requirements based on the import scenario.

UNK should only be used if information is not able to be obtained. Utilizing this code may lead to manual reviews and delayed processing by FDA.
