---

The Center for Drug Evaluation and Research, Office of New Drugs, Office of Hematology and Oncology Products is recruiting BE/BC Medical Oncologists and Hematologists to serve as **Clinical Reviewers**.

## **Help Define The Future Of Hematology And Oncology At The FDA!**

Our work involves the regulatory review of new, cutting-edge biotechnology-based therapies for cancer and non-malignant hematological disorders including:

- ~ Kinase Inhibitors
- ~ Monoclonal Antibodies
- ~ Anti-Angiogenic Agents
- ~ Novel Cytotoxic Agents
- ~ Growth Factors
- ~ PARP Inhibitors
- ~ Immune Checkpoint Inhibitors
- ~ Anti-thrombotics/Thrombolytics
- ~ Chemoprevention Agents
- ~ Immunoconjugates
- ~ Cytokines
- ~ Proteasome Inhibitors

Medical Officers are the cornerstone of FDA's mission to ensure the safety and efficacy of drug products. Our medical officers lead multidisciplinary scientific teams of highly skilled professionals on projects that provide intellectually-stimulating interactions with academic investigators, NCI/NIH, cooperative groups, and pharmaceutical and biotechnology companies. Professional training provided in all aspects of FDA regulatory activities and the process of drug development.

Salary and Benefits: Civil service base salary at the GS-14 level, plus a supplemental allowance determined by relevant experience, medical specialty, and board certification. Federal Government benefits package. Relocation expenses and student loan repayment may be paid for eligible candidates. Up to one day per week for academic clinical activities or research possible. Flexible and/or home-based working schedules available. Opportunities for scientific conferences, professional meetings, and career advancement.
