

FDA FACT SHEET

EGG SAFETY REGULATORY PROGRAM STANDARDS DEVELOPMENT COOPERATIVE AGREEMENT PROGRAM

Program Description

- Conducting egg regulatory program self-assessments including a review of state egg laws and regulations in comparison to the current federal egg safety laws and regulations.
- Developing and implementing an agreement and protocol for sharing egg regulatory inspections and information between states and the FDA.
- Identifying gaps and areas of improvement between federal and state egg programs and providing recommendations for national egg regulatory program standards for states.

Intended Outcomes

- Facilitating long-term improvements to the National Integrated Food Safety System by strengthening collaboration, improving states' regulatory and surveillance protection programs for eggs, sharing strategies, and development of national egg regulatory program standards for states.
- Encouraging state agencies to make recommendations towards the establishment of national egg regulatory program standards for states to adopt.
- Funding egg program self-assessments, reviewing of state and federal laws and regulations that pertain to eggs, and deploying electronic system to facilitate sharing of egg inspection information.

Program Metrics

- Current program funding: \$293,690.37
- Current number of awards: 2
- Current partners: California, Iowa

The FDA, an agency within the U.S. Department of Health and Human Services, protects the public health by assuring the safety, effectiveness, and security of human and veterinary drugs, vaccines and other biological products for human use, and medical devices. The agency also is responsible for the safety and security of our nation's food supply, cosmetics, dietary supplements, and products that give off electronic radiation, and for regulating tobacco products.
