

FDA FACT SHEET

FOOD PROTECTION TASK FORCE GRANT PROGRAM

Program Description

- The Food Protection Task Force (FPTF) grant is available to state, local, and tribal governments to form task forces that consist of government, industry, academia, and consumer groups that create an effective state-wide infrastructure for outreach, response, and information sharing.
- Meetings funded as part of the FPTF grant aim to foster communication, cooperation and collaboration among state, local, and tribal food protection, public health, agriculture, and regulatory agencies.

Intended Outcomes

- Provide a forum for all the stakeholders of the food protection system—regulatory agencies, academia, industry, consumers, state legislators, boards of health and agriculture, and other interested parties to improve food safety and defense.
- Communicate and disseminate key FDA objectives and mandates including the Food Safety Modernization Act (FSMA) to relevant stakeholders.
- Collect, compile, and communicate stakeholder interests and concerns to FDA regarding information and activities covered under this program.
- Assist in adopting or implementing the Food Code and other food protection regulations including FSMA.
- Conduct and present findings to stakeholders regarding research, investigations, and demonstrations, relating to the causes or prevention of food related illnesses and injuries in the context of food safety and defense.

Program Metrics

- Current program funding: \$123,093
- Current number of awards: 13

FPTF Awardees (FY2017)

District of Columbia	Georgia	Indiana	Kansas	Michigan
Minnesota	Missouri	North Carolina	Nebraska	Nevada
Tennessee	Washington	West Virginia

The FDA, an agency within the U.S. Department of Health and Human Services, protects the public health by assuring the safety, effectiveness, and security of human and veterinary drugs, vaccines and other biological products for human use, and medical devices. The agency also is responsible for the safety and security of our nation’s food supply, cosmetics, dietary supplements, and products that give off electronic radiation, and for regulating tobacco products.
