Bargaining Unit Status: **Bargaining Unit Position**

Office Location: FDA
Center for Tobacco Products
10903 New Hampshire Ave
Silver Spring, MD 20993

Opening Date: **March 7, 2018**
Closing Date: **March 20, 2018**

Area of Consideration: **FDA-Wide**

The CTP Office of Science, Division of Nonclinical Science offers a fast-paced, dynamic environment and an opportunity to work with dedicated, energetic people who really want to make a difference and improve public health. The position is ideal for someone who wants to have a critical role in the organization and would enjoy the challenge of handling a variety of assignments related to the regulation of tobacco products.

Duties include:

The selected employee will serve as a Lead Biologist in the Environmental Science Branch that supports CTP's scientific review programs and activities, as they pertain to the National Environmental Policy Act (NEPA). The duties may include:

- Reviews documents submitted for regulatory action; provides secondary review of documents prepared by other OS scientists.
- Demonstrates technical leadership by: (1) interpreting complex biological and environmental aspects of reports/submissions for tobacco products; (2) reviewing study protocols and offering recommendations related to study design; (3) interpreting scientific data and if needed, performing additional analysis of data submitted; (4) preparing a comprehensive synopsis of reviews of reports/applications with recommendations for revision, acceptance or rejection, and providing specific supporting reasons for the environmental reviewer's recommended disposition and any technical deficiencies requiring action by the sponsor; (5) implementation of policies and recommendations.

- Provides advanced expertise by keeping abreast of new findings through review of scientific literature, participation in professional meetings and undertaking independent research. Proposes areas of study for regulatory environmental research projects. Develops state-of-the-art environmental projects to address gaps in scientific knowledge needed for effective regulation of tobacco products.
- Recognizes the need for, and initiation of, new and amended regulations, policies, guidances and procedures. Develops and recommends new and revised guidelines for regulated products. Provides scientific support in developing guidance and regulation.
- Provides expert advice and assistance to scientists and officials on a wide range of matters. Provides verbal and written conclusions to other federal agencies, industry, universities and state, local and foreign governments. The incumbent also compiles data to prepare presentations to support the Agency's recommendations on scientific issues.
- Ensures that the organization's strategic plan, mission, vision, and values are communicated to the team and integrated into the team's strategies, goals, objectives, work plans and work products and services.
- Articulates and communicates to the team the assignment, project, problem to be solved, actionable events, milestones, and/or program issues under review, and deadlines and time frames for completion.
- Leads the team in identifying, distributing and balancing workload and tasks among employees in accordance with established work flow, skill level and/or occupational specialization; making adjustments to accomplish the workload in accordance with established priorities to ensure timely accomplishment of assigned team tasks; and ensuring that each employee has an integral role in developing the final team product.
- Reports to the supervisor periodically on team and individual work accomplishments, problems, progress in mastering tasks and work processes, and individual and team training needs.
- Represents the team consensus and convey the team's findings and recommendations in meetings and dealings with other team leaders, program officials, the public, and other customers on issues related to or that have an impact on the team's objectives, work products, and/or tasks.
- Leads the team in assessing its strengths and weaknesses and provide leadership to the team in exploring alternatives and determining what improvements can be made (e.g., in work methods, processes and procedures).
- Performs other duties as assigned.

Desired Knowledge and Skills:

- Ability to serve as an expert and the authority regarding the biological and environmental impacts of tobacco products as it relates to the National Environmental Policy Act (NEPA). Because of unique qualifications and experience, the incumbent applies

extraordinary technical expertise to unique, critical and scientifically complex situations and develops new approaches to problems that are difficult.

- Ability to provide authoritative and professional expertise in the biological and environmental impacts of tobacco products as it relates to NEPA. Provides consultation and advice to the OS and CTP leadership in areas of tobacco products as related to NEPA.
- Skill in applying the theories, principles and methods in the field of biology as it relates to environmental science is required in order to provide technical expertise and leadership to the team.
- Demonstrate the skill to identify problems, gather information, draw conclusions, recommend solutions, prepare papers and reports for publication, provide advice to other scientists, and negotiate acceptance and implementation of recommendations.
- Knowledge of CTP missions, programs and organizations structures sufficient to collaborate with other CTP staff on public health issues and problems.
- Excellent organizational skills.
- Skill in working collaboratively.
- Excellent oral and written communication skills.

Application Procedure:

Supervisory concurrence should be obtained before you apply to this detail. The detail opportunity is open to all qualified candidates at the GS-13 and GS-14 grade levels or Commissioned Corps officers (04 and 05). If you are not currently in the 0401 series, please provide a copy of your transcripts.
