

How Health Canada uses MDSAP

Frédéric Hamelin
Health Canada

Date: 2018/05/09

- Health Canada uses MDSAP certificates as evidence of conformity to *Medical Devices Regulations* sections 32(2)(f), 32(3)(j) and 32(4)(p)
- In this sense, they replace CMDCCAS certificates.

- Health Canada may also investigate information reported on Early Awareness Communication (5-Day warnings) where there are risks to patients or public health.

- Health Canada will not take action or investigate issues related to the specific requirements of the other participating jurisdictions.
