Instructions: The time lapse from landing any individual fish to being packed in ice in the hold must be less than 20 minutes. A "series" is measured as a fishing period from landing the first fish of the series to stowing the last iced fish of the series in the hold which can not exceed 6 hours. All scombrotoxin-forming fish are to be completely surrounded with ice at all times; checked at least every 12 hours.

Comment on any delays or problems (include affected series numbers): None

To be filled out by ABC Fish Company

ABC Fish Company Off-Loading Inspector Initials: _____ Off-loading Date: _____ Time: _____

Vessel Record Acceptable and Critical Limits Met: YES NO Comment:
