Research/Scholarship Focus:

The majority of my clinical research focus is surrounded the area of general internal medicine. I have developed a particularly strong interest in Community-Acquired Pneumonia. I have spent much of my academic time becoming an expert in Community-Acquired Pneumonia by lecturing, writing and working on quality improvement at my institution. I also have developed expertise and have continued interest in the following additional areas: aortic dissection, heart failure, pericarditis, pulmonary embolism, physical examination skills and the use of point of care diagnostics in medicine.

Formal Teaching:

a. Medical Student Teaching

10/98		Evaluation of the Comatose Patient M3 Lecture series Grady Memorial Hospital
10/98		Adult Immunization M3 Lecture series Grady Memorial Hospital
