

**BLUE BIRD
BOV - COCCI
Type B Medicated Confined Sheep Feed**

For prevention of coccidiosis caused by *Eimeria ovina*, *E. crandallis*, *E. ovinoidalis* (*E. ninakohlyakimovae*), *E. parva*, and *E. intricata* in sheep maintained in confinement.

Active Drug Ingredient

Lasalocid (as Lasalocid sodium).....31 – 80,000 g/ton*

Guaranteed Analysis

^a Guarantee required only when nutrient added except when the feed is intended, represented or serves as a principal source of the nutrient.

^b Sodium guarantee required only when total sodium exceeds that furnished by the maximum salt guarantee.

^c Copper minimum and maximum guarantee for sheep required when added or level exceeds 20 ppm

Ingredients

Ingredients as defined by AAFCO.

Mixing Directions

Mix this Type B medicated feed with non-medicated feed ingredients to manufacture one ton of complete Type C medicated feed for sheep containing 20 – 30 grams lasalocid per ton.

The following table provides examples of mixing rates:

Type B lasalocid concentration (g/ton)	Type B per ton of Type C (lb)	Non-medicated feed per ton of Type C (lb)	Type C lasalocid concentration (g/ton)
100	400	1600	20
100	600	1400	30
5000	8	1992	20
5000	12	1988	30
10000	4	1996	20
10000	6	1994	30

The resulting Type C medicated feed should be fed continuously at a rate to provide not less than 15 mg or more than 70 mg lasalocid sodium activity per head per day depending on body weight.

Caution

Feeding undiluted or mixing errors may result in an excess lasalocid concentration which could be fatal to cattle and sheep. Do not allow horses or other equines access to Type A articles or Type B feeds containing lasalocid as ingestion may be fatal. Safety of lasalocid for use in unapproved species has not been established.
