Sterile Product Outsourcing Permit

Sterile Product Outsourcing shall mean the compounding and distribution of sterile medications both in-state and out-of-state in accordance with FDA guidelines. The facility must apply for a Human Drug Compounding Outsourcing Registration from the U. S. Food and Drug Administration (FDA) and must comply with applicable FDA Current Good Manufacturing Practice requirements and other applicable guidelines. Facilities are subject to inspection by FDA on a risk-based schedule. Facilities must be in compliance with applicable U. S. Drug Enforcement Administration (DEA) regulations. On the application for Sterile Product Outsourcing, the Pharmacist-In-Charge must certify that the facility is in full compliance with all applicable FDA and DEA regulations and guidelines. The facility may not hold a pharmacy permit within the same location as an Outsourcer.
