Drug Facts

Active ingredient (in each X mg)
Naloxone hydrochloride X mg
Purpose
Emergency treatment of opioid overdose

Uses
- To "revive" someone during an overdose from many prescription pain medications or street drugs, such as heroin
- This medicine can save a life

Directions

1. CHECK

   Step 1: CHECK:
   - CHECK for a suspected overdose: the person will not wake up or is very sleepy or not breathing well.
   - yell "Wake up!"
   - shake the person gently
   - if the person is not awake, go to Step 2

2. GIVE

   Step 2: GIVE 1st dose
   - GIVE the 1st dose of this medicine
   - place the injector on the LEG above the knee and press down

3. CALL

   Step 3: CALL
   - CALL 911 immediately after giving the 1st dose

4. WATCH & GIVE

   Step 4: WATCH & GIVE
   - WAIT 2-3 minutes after the 1st dose to give the medicine time to work
   - if the person wakes up: Go to Step 5
   - if the person does not wake up:
     - CONTINUE TO GIVE doses every 2-3 minutes until the person wakes up
     - it is safe to keep giving doses

5. STAY

   Step 5: STAY
   - STAY until ambulance arrives: even if the person wakes up
   - GIVE another dose if the person becomes very sleepy again
   - You may need to give all the doses in the pack

Warnings

When using this product: some people may experience symptoms when they wake up, such as shaking, sweating, nausea, or feeling angry. This is to be expected.
