

**Postdoctoral Fellow, Division of Neurotoxicology  
National Center for Toxicological Research/FDA**

A postdoctoral fellowship opportunity is available in the Division of Neurotoxicology at the National Center for Toxicological Research (NCTR) on the Jefferson Laboratories Campus of the U.S. Food and Drug Administration (FDA) located in Jefferson, Arkansas.

The NCTR, located approximately 35 miles southeast of Little Rock, conducts FDA mission-related research that is of critical importance to the Agency in developing a scientifically sound basis for regulatory decisions. Over 110 Ph.D. scientists and 400 support scientists, on-site-contractors and administrative staff make up a dynamic group of professionals in the NCTR organization. Undergraduate and graduate students, post-doctoral fellows and visiting scientists also pursue education and research opportunities in a multi-disciplinary team atmosphere. For more information on NCTR research and training activities, visit <http://www.fda.gov/NCTR>.

The successful candidate will work closely with the Principal Investigator (PI) in a multi-disciplinary research effort and be trained in: (a) examining the role of vascular dysfunction in brain of two transgenic rodent models of Alzheimer's disease (AD) and the role of diet and its relevance to human AD; (b) comparative analysis of intestinal and neuronal pathology for biomarker identification and its correlation with the microbiome in AD using transgenic rats and postmortem human tissues.

The primary training opportunities of this position will be to work on the projects using various techniques available in the NCTR's Division of Neurotoxicology, analyze data from these experiments, assist with neuropathological/neurochemical assays, present findings at scientific meetings, and publish results in respected scientific journals.

This program is administered by the Oak Ridge Institute for Science and Education (ORISE) through its contract with the U.S. Department of Energy. The initial appointment is for one year but may be renewed upon recommendation and contingent on the availability of funds. The participant will receive a monthly stipend commensurate with education level and experience. Proof of health insurance is required for participation in this program. The appointment is full-time at NCTR in Jefferson, Arkansas. Participants do not become employees of FDA or the program administrator.

**Qualifications**

Within the last five years, applicants must have received a Ph.D., M.D., or equivalent in neuroscience, neurobiology, or toxicology.

Interested individuals should send a curriculum vitae, and names of three references with complete contact information to Sumit Sarkar, Division of Neurotoxicology, National Center for Toxicological Research/FDA, 3900 NCTR Road, Jefferson, Arkansas 72079; Phone 870-543-7834; fax 870-543-7745; Email: [Sumit.Sarkar@fda.hhs.gov](mailto:Sumit.Sarkar@fda.hhs.gov)

Applications will be accepted until the appointment is filled. Start date is now scheduled as August 1, 2019.

FDA/NCTR is a smoke free environment.
