

Number of pregnancies and fetal outcomes in cases with known outcomes in pregnancies with exposure to Dengvaxia by type of report and exposure timing

	Spontaneous Postmarketing Reports												Clinical Trials					Other (please specify source)						
Time of Report	Prospective						Retrospective																	
Time of Exposure	PTC	1 st Tri	2 nd Tri	3 rd Tri	Unk Tri	Total	PTC	1 st Tri	2 nd Tri	3 rd Tri	Unk Tri	Total	PTC	1 st Tri	2 nd Tri	3 rd Tri	Total	PTC	1 st Tri	2 nd Tri	3 rd Tri	Unk Tri	Total	
Outcome																								
Spontaneous abortion < 20 weeks w/o CA																								
Spontaneous abortion < 20 weeks w/ CA																								
Elective abortion w/o CA																								
Therapeutic abortion of fetus w/ CA																								
Ectopic																								
Molar																								
Fetal death ≥ 20 weeks w/o CA																								
Fetal death ≥ 20 weeks w/ CA																								
Live birth																								
LB w/ CA																								
Major CA*																								
Minor CA																								

PTC = prior to conception; Tri = trimester; unk = unknown; LB = Live birth; CA = Congenital anomaly

* Please provide a definition for major and minor congenital anomalies.
