FINDING OF NO SIGNIFICANT IMPACT FOR
Product Marketing Orders for
Winston Gold 100’s Box, Winston Gold Box, Winston Red 100’s Box, Winston Red Box, 
Winston White 100’s Box, Winston White Box
Manufactured by ITG Brands, LLC

The Center for Tobacco Products of the Food and Drug Administration (FDA) has carefully considered 
the potential environmental impacts of these actions and has concluded that these actions will not have 
significant effects on the quality of the human environment. Therefore, environmental impact 
statements are not required.

ITG Brands, LLC wishes to introduce six new filtered, combusted cigarettes into interstate commerce for 
commercial distribution in the United States and submitted to FDA six requests for exemption from 
substantial equivalence to obtain marketing orders under the provisions of section 905(j)(3) of the 

The Agency prepared the programmatic environmental assessment (PEA), dated February 7, 2019, in 
accordance with the Council on Environmental Quality’s regulations (40 CFR 1500-1508) implementing 
the National Environmental Policy Act (NEPA) and FDA’s NEPA regulations (21 CFR 25.40) to support the 
finding of no significant impact. The evidence supporting this finding is contained in the attached PEA, 
which is available to the public upon request.

The PEA evaluates potential environmental effects due to manufacturing, use, and disposal of the new 
products. No increased or new types of environmental impacts due to manufacturing are anticipated. 
The Agency does not foresee that use of the new products would result in new or different 
environmental impacts. The Agency believes that the disposal of the new products is the same as the 
disposal conditions of other filtered, combusted cigarettes that are currently marketed in the United 
States. Therefore, the Agency does not foresee adverse impacts to the environment due to the 
proposed actions as a result of the manufacturing, use and disposal of the new products.
