

## **FINDING OF NO SIGNIFICANT IMPACT**

### **Product Marketing Orders for**

**Longhorn Fine Cut Natural 204.12 g, Longhorn Fine Cut Wintergreen 408.24 g, Longhorn Fine Cut Wintergreen 204.12 g, Longhorn Long Cut Natural 408.24 g, Longhorn Long Cut Natural 204.12 g, Longhorn Long Cut Straight 204.12 g, Longhorn Long Cut Wintergreen 204.12 g, Longhorn Long Cut Mint 408.24 g, Longhorn Long Cut Mint 204.12 g**

### **Manufactured by Swedish Match USA Inc.**

The Center for Tobacco Products of the Food and Drug Administration (FDA) has carefully considered the potential environmental impact of these actions and has concluded that these actions will not have significant effects on the quality of the human environment. Therefore, environmental impact statements are not required.

Swedish Match USA Inc. wishes to introduce nine new moist snuff products into interstate commerce for commercial distribution in the United States and submitted to FDA nine substantial equivalence reports to obtain marketing orders under the provisions of sections 910 and 905(j) of the Federal Food, Drug, and Cosmetic Act.

The Agency prepared the programmatic environmental assessment (PEA), dated October 24, 2018, in accordance with the Council on Environmental Quality's regulations (40 CFR 1500–1508) implementing the National Environmental Policy Act (NEPA) and FDA's NEPA regulations (21 CFR 25.40) to support the finding of no significant impact. The evidence supporting this finding is contained in the PEA, which is available to the public upon request.

The PEA evaluates potential environmental effects due to manufacturing, use, and disposal of the new products. No increased or new types of environmental impacts due to manufacturing are anticipated. The Agency does not foresee that use of the new products would result in new or different environmental impacts. The Agency believes that the disposal of the new products would be the same as the disposal conditions of similar smokeless tobacco products that are currently marketed. Therefore, the Agency does not foresee significant adverse impacts to the environment due to the proposed actions as a result of manufacturing, use, and disposal of the new products.
