This document lists observations made by the FDA representative(s) during the inspection of your facility. They are inspectional observations and do not represent a final Agency determination regarding your compliance. If you have an objection regarding an observation, or have implemented, or plan to implement, corrective action in response to an observation, you may discuss the objection or action with the FDA representative(s) during the inspection or submit this information to FDA at the address above. If you have any questions, please contact FDA at the phone number and address above.

DURING AN INSPECTION OF YOUR FIRM WE OBSERVED:

OBSERVATION 1
Non-microbial contamination was observed in your production area.

Specifically, on July 9, 2019, after producing Rx \( (b) (6) \), 5% Flurbiprofen/ 2% Cyclobenzaprine/ 5% Lidocaine cream, and subsequent cleaning, the following were observed:

A) Apparent dried powder residue in the front grate of the biological safety cabinet (hood). There were approximately six grate holes observed with yellow residue near the scale inside the hood, approximately three grate holes observed with white residue, and approximately another four grate holes observed with yellow residue.

B) Apparent white powder residue remained on the hood’s processing surface. We observed Flurbiprofen powder spillage during weighing operations for Rx \( (b) (6) \).

C) Smearied residue remained immediately in front of the grate.

D) Yellow staining remained on scale \( (b) (4) \) located inside the hood. The scale is used to weigh raw materials for production.
