# Enforcement Policy for Personal Protective Equipment (PPE) During COVID-19: Immediately in Effect Guidances

Office of Health Technology 4: Surgical and Infection Control Devices  
Office of Product Evaluation and Quality  
Center for Devices and Radiological Health

March 6, 2020

# Agenda

- Introduction
- Devices
  - Face Mask and Respirator Policies
  - Emergency Use Authorizations (EUAs) for Face Masks, Surgical Masks, and N95 Respirators
  - EUAs for Decontamination of Face Masks and Respirators
  - Gowns
  - Gloves
- Resources
- Questions

# Objectives

- To describe the FDA's enforcement policies for face masks, respirators, gowns, and gloves.
- To describe the FDA's Emergency Use Authorizations for non-NIOSH-approved disposable filtering facepiece respirators, NIOSH-approved air purifying respirators, and N95 respirator decontamination.

# Background

- Most personal protective equipment, such as surgical gowns, face masks, and respirators are regulated by the FDA.
- The COVID-19 pandemic presents significant challenges to the availability of personal protective equipment in health care facilities.
- The FDA has authorized the emergency use of certain personal protective equipment and issued guidance on enforcement policies that together establish maximum regulatory flexibility to help facilitate access to critical medical supplies.

# Face Mask and Respirator Policies

Cynthia J. Chang, Ph.D.

Director

Division of Infection Control & Plastic and  
Reconstructive Surgery Devices

# Enforcement Policy Guidance

## Enforcement Policy for Face Masks and Respirators During the Coronavirus Disease (COVID-19) Public Health Emergency

- Achieve maximum regulatory flexibility while assuring products are appropriate for their use.
- Discretion as to certain other FDA requirements
- In effect for the duration of the national emergency

# Scope

- Face masks, face shields, and N95 respirators not intended for a medical purpose
- Face masks intended for a medical purpose that are not intended to provide liquid barrier protection
- Face shields intended for a medical purpose
- Surgical masks intended to provide liquid barrier protection
- Alternatives when FDA-cleared or NIOSH-approved N95 respirators are not available

## Face Mask

A mask, with or without a face shield, that covers the user's nose and mouth and may or may not meet fluid barrier or filtration efficiency levels.

## N95 Respirator

A disposable half-mask filtering facepiece respirator (FFR) that covers the user's airway (nose and mouth) and offers protection from particulate materials at an N95 filtration efficiency level per 42 CFR 84.181. An N95 FFR used in a health care setting is regulated by the FDA under 21 CFR 878.4040 (FDA product code MSH) and is either a class II device that is exempt from premarket notification or is a class II cleared device.

## Face Shield

A face shield is a device used to protect the user's eyes and face from bodily fluids, liquid splashes, or potentially infectious materials. Generally, a face shield is situated at the crown of the head and is constructed with plastic to cover the user's eyes and face.

## Surgical mask

A mask that covers the user's nose and mouth and provides a physical barrier to fluids and particulate materials. The mask meets certain fluid barrier protection standards and Class I or Class II flammability tests, CPSC CS-191-53 Flammability Test Method (16 CFR 1610) Standard for Flammability of Clothing Textiles.

# Enforcement Policy

The FDA does not intend to object to distribution and use (including importation) of the devices below without compliance with certain regulatory requirements, including 510(k), registration and listing, and quality system regulation requirements, when the devices are tested and labeled consistent with the enforcement policy.

## Devices

- Face Shields Intended for a Medical Purpose
- Face Masks Intended for a Medical Purpose that are NOT Intended to Provide Liquid Barrier Protection
- Surgical Masks Intended to Provide Liquid Barrier Protection

# Alternatives When FDA-Cleared or NIOSH-Approved N95 Respirators are not Available

When FDA-cleared or NIOSH-approved N95 respirators are not available, the FDA does not intend to object to the distribution (including importation) and use of respirators identified in the CDC recommendations: [Strategies for Optimizing the Supply of N95 Respirators](#)

## **Importers Note: For non-EUA products**

- Because the FDA cannot confirm the authenticity of these respirators, the FDA recommends that importers take appropriate steps to verify the authenticity of the products they import.

# Emergency Use Authorizations (EUAs) for Face Masks, Surgical Masks, and N95 Respirators

Cynthia J. Chang, Ph.D.

Director

Division of Infection Control & Plastic and  
Reconstructive Surgery Devices

# Emergency Use Authorization

- Helps get promising medical products to patients as quickly as possible by allowing unapproved medical products or unapproved uses of approved medical products to be used in an emergency when there are no adequate, approved, and available alternatives
- Requires FDA review of performance, safety and labeling
- Allows devices not FDA-cleared or approved to be marketed in the U.S.
- Waives FDA cGMP and the quality system requirements, 21 CFR Part 820 (design, manufacture, packaging, labeling, storage, and distribution)
- In effect for the duration of the national emergency

# EUAs for Face Masks Intended for a Medical Purpose, Surgical Face Masks and N95 Respirators

Detailed information on what to include in your EUA request is available in:

- [NIOSH-Approved Air Purifying Respirators for Use in Health Care Settings During Response to the COVID-19 Public Health Emergency](#)
- [Non-NIOSH-Approved Disposable Filtering Facepiece Respirators Manufactured in China](#)
- [Imported, Non-NIOSH-Approved Disposable Filtering Facepiece Respirators](#)

# EUA Requests

Requests should include:

- General information
- Product labeling
- Whether the device currently has marketing authorization in another regulatory jurisdiction (including certification number)
- Whether the device is manufactured in compliance with 21 CFR Part 820, ISO 13485 or an equivalent quality system
- Description of testing conducted on the device

Send requests to [CDRH-NonDiagnosticEUA-Templates@fda.hhs.gov](mailto:CDRH-NonDiagnosticEUA-Templates@fda.hhs.gov)

# EUAs for Decontamination of Face Masks and Respirators

Clarence Murray III, Ph.D.

Team Leader

Scientific Reviewer

# EUAs for Decontamination of Face Masks and Respirators

Detailed information on what to include in your EUA request is available in Section VI. of the [Enforcement Policy for Face Masks and Respirators During the Coronavirus Disease \(COVID-19\) Public Health Emergency](#)

Submit requests to:

[CDRH-NonDiagnosticEUA-Templates@fda.hhs.gov](mailto:CDRH-NonDiagnosticEUA-Templates@fda.hhs.gov)

# EUAs for Decontamination of Face Masks and Respirators

Requests should include:

1. Critical Cycle Parameters
2. Validation of disinfection (bioburden reduction)
3. Chain of custody and safeguards to prevent inadvertent exposure
4. Material compatibility
5. Any applicable filtration performance
6. Fit test data
7. Labeling (decontaminated device)

# Gowns

BiFeng Qian, Ph.D.  
Scientific Reviewer

# Enforcement Policy Guidance

## Enforcement Policy for Gowns, Other Apparel, and Gloves During the Coronavirus Disease (COVID-19) Public Health Emergency

- Achieves maximum regulatory flexibility while assuring the product is appropriate for its use
- In effect for the duration of the national emergency

# Scope

- Gowns and other apparel are products intended to protect the user from the transfer of materials in the wearer's environment.
- The classification regulation and associated product codes for FDA-regulated gowns and other apparel covered by the guidance are listed in the resources section of this presentation
- FDA-regulated gowns and other apparel that are covered by the guidance are listed in the resources section of this presentation
- This guidance does not apply to Level 4 surgical gowns or togas.

# Gowns

## Minimal-to-Low Barrier Protection

- ANSI/AAMI PB70 Level 1 protection or equivalent
- ANSI/AAMI PB70 Level 2 protection or equivalent

## Moderate-to-High Barrier Protection

- ANSI/AAMI PB70 Level 3 protection or equivalent
- ANSI/AAMI PB70 Level 4 protection or equivalent

# Enforcement Policy

The FDA does not intend to object to distribution and use (including importation) of the devices below without compliance with certain regulatory requirements, including 510(k), registration and listing, and quality system regulation requirements when the devices are tested and labeled consistent with the enforcement policy.

## Devices

- Non-Surgical Gowns and Minimal-to-Low Barrier Protection Surgical Apparel
- Moderate-to-High Barrier Protection Surgical Gowns

# Gloves

BiFeng Qian, Ph.D.  
Scientific Reviewer

# Gloves

## **Patient Examination Glove**

A disposable device intended for a medical purpose that is worn on the examiner's hand or finger to prevent contamination between patient and examiner.

## **Surgeon's Glove**

A device intended to be worn on the hands of operating room personnel to protect a surgical wound from contamination.

# Enforcement Policy Guidance

## Enforcement Policy for Gowns, Other Apparel, and Gloves During the Coronavirus Disease (COVID-19) Public Health Emergency

- Follow [CDC's recommendations](#) on the use of PPE during the COVID-19 outbreak
- Gloves not intended for medical purposes are not medical devices
- FDA-regulated gloves that are covered by the guidance are listed in the resources section of this presentation
- In effect for the duration of the national emergency

# Gloves Not Intended for a Medical Purpose

- When evaluating whether these products are intended for a medical purpose, among other considerations, the FDA will consider whether the product:
  - Is labeled or otherwise intended for use by a health care professional;
  - Is labeled or otherwise for use in a health care facility or environment; and
  - Includes any drugs, biologics, or anti-microbial or anti-viral agent.

# Enforcement Policy

The FDA does not intend to object to distribution and use (including importation) of the devices below without compliance with certain regulatory requirements, including 510(k), registration and listing, and quality system regulation requirements when the devices are tested and labeled consistent with the enforcement policy.

## Devices

- Patient Examination Gloves
- Surgeon's Gloves
