Read through the instructions completely before collecting the sample. To see an instructional video or report a missing item in the kit, visit Labcorp.com/HomeKit.

Instructions for parents or guardians collecting a sample for a child ages 2-13. If you are under 18, please ask your parent or guardian to assist with scheduling a pickup or confirming drop box locations and pickup times.

Visit https://bit.ly/fedexdropbox to view FedEx drop box locations and pickup schedules. For more information, refer to the back of this instruction card.

The sample must be shipped Monday through Friday and on the same day that you collect it. Do not collect the sample until you or your parent or guardian confirm pickup times of the drop box or have confirmed your scheduled pickup.

Wash and dry hands before opening the kit. Open the kit and place all the contents on a clean, dry surface.

Take the swab out of its package. Do not touch the tip of the swab with your hands.

Unscrew the top of the tube. Hold swab in one hand and tube in the other, being careful not to spill the liquid. Do not drink the liquid.

Insert the tip of the swab into one nostril. Insert just until the tip of the swab is no longer visible.

Rotate in a circle around the entire inside edge of the nostril at least 3 times.

Take the swab out of the nostril. Using the same end of the swab, repeat steps 6 and 7 in the other nostril.

Remove the swab from the second nostril and place in the tube. The end of the swab that went into the nose should be placed into the tube first so that it sits down in the liquid. Screw the top of the tube back on.

Wash and dry hands thoroughly again. Insert tube into the biohazard specimen bag. Seal the biohazard specimen bag. Fold the specimen bag in half.

Fill out the Specimen Confirmation Form. Provide the date and time of collection in the Patient Section.

Place the specimen bag and Specimen Confirmation Form into the white shipping box and close the lid. Place the shipping box into the FedEx return pack. Remove the adhesive cover strip and seal the FedEx return pack closed.

Return the postage-paid, pre-addressed FedEx return pack to Labcorp. You can deliver it to a FedEx drop box or schedule a pickup. It’s important to ship the specimen Monday through Friday and on the same day you collect it.

Results available in the Labcorp Patient™ portal 1 to 2 days after the specimen arrives at the lab. Visit patient.labcorp.com to set up or access your account. Results also delivered to the ordering healthcare provider. To view a dependent or child’s results, add them to your account.
Ship the Specimen to Labcorp via FedEx

The specimen must be shipped Monday through Friday on the same day that you collect it.

You have 2 options for shipping the sample.

Kit includes:
- Distributed by Labcorp
- 531 South Spring Street
- Burlington, NC 27215

1 confirmation form
1 Biohazard specimen bag with absorbent material
Box that kit was originally shipped in
FedEx Return pack
UN 3373

Las instrucciones en español están disponibles en línea en www.labcorp.com/HomeKit.

1 FedEx Drop Box
It's important to bring your specimen to a drop box on the same day you collect it before the last Express pick up.

Deliver your specimen to a drop box Monday through Friday.
Do not take it to a FedEx office.
Do not place kit in drop box on Saturday or Sunday.

Schedule a FedEx Pickup
Schedule your FedEx pickup for a weekday (Monday through Friday).
Call FedEx at 800-463-3339 and answer some questions.

FedEx: “What are you calling about?”
You: “FedEx Express® return pickup”
FedEx: “...a pickup request for a return. To arrange a pickup for today or tomorrow, depending on availability, say “pickup.””
You: “Pickup”
FedEx: “Is the word “stamp” written anywhere on your return label?”
You: “No”
FedEx: “What is the tracking number?”
You: Provide the tracking number (TRK#) from the return label
FedEx: “What kind of return are you calling about?”
You: “FedEx Express”
Provide additional information as requested.
You may be asked for the pickup location address, number of packages to be picked up, day and time window for the pickup, or if your shipment is currently ready.
Note the confirmation pickup number provided. If you are asked for a credit card or account number, state that this is a FedEx Express return pickup and provide the tracking number (TRK#) from the return label.

Do not collect your specimen until you confirm pickup times of the drop box or have confirmed your scheduled pickup.

The Labcorp At Home COVID-19 Test Home Collection Kit is intended for use with individual anterior nasal swab specimens from individuals age 18 years and older (self-collected), 14 years and older (self-collected under adult supervision), or 2 years and older (collected with adult assistance) when directly ordered by a HCP.

• This product has not been FDA cleared or approved, but has been authorized for emergency use by FDA under an EUA;
• This product has been authorized only for the detection of nucleic acid from SARS-CoV-2, not for any other viruses or pathogens; and
• The emergency use of this product is only authorized for the duration of the declaration that circumstances exist justifying the authorization of emergency use of in vitro diagnostics for detection and/or diagnosis of COVID-19 under Section 564(b)(1) of the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. § 360bbb-3(b)(1), unless the declaration is terminated or authorization is revoked sooner.

If you are a parent or guardian collecting a sample for a child ages 2–13, please read instructions carefully and follow directions step by step.

If you are under 18 years old, please ask your parent or guardian to review the instructions and provide assistance with scheduling a FedEx pickup or confirming FedEx drop box locations and pickup times.
1 Register your kit. Register this kit the same day you collect your nasal swab sample. You must drop off your kit at your CVS location (selected during registration) on the same day that you collect your nasal swab sample. To register the kit, scan the QR code on the package or visit CVS.com/DropOff and follow the instructions. If you have questions, please call 866-389-2727.

2 Please read through the instructions below or visit CVS.com/DropOff before collecting sample.

3 Wash and dry hands before opening the kit. Open the kit and place all the contents on a clean, dry surface.

4 Take the swab out of its package. Do not touch the tip of the swab with your hands.

5 Unscrew the top of the tube. Hold swab in one hand and tube in the other, being careful not to spill the liquid. Do not drink the liquid.

6 Insert the tip of the swab into one nostril. Insert just until the tip of the swab is no longer visible.

7 Rotate in a circle around the entire inside edge of the nostril at least 3 times.

8 Take the swab out of the nostril. Using the same end of the swab, repeat steps 6 and 7 in the other nostril.

9 Remove the swab from the second nostril and place in the tube. The end of the swab that went into the nose should be placed into the tube first so that it sits down in the liquid. Screw the top of the tube back on.

10 Wash and dry hands thoroughly again. Insert tube into the biohazard specimen bag. Seal the biohazard specimen bag. Place biohazard bag in the original kit box.

11 Drop of your kit at the CVS location provided during registration on the same day you collect it, Monday through Friday or before noon on a Saturday. Place kit in the collection box at the front of the store.

12 When your results are ready, you will receive a text with link to view the result. Or, you can access your results at CVS.com/DropOff.
Kit includes:

- 1 Saline collection tube
- 1 Swab pack
- 1 Biohazard specimen bag with absorbent material

If you are under 18 years old, please ask your parent or guardian to review the instructions and provide assistance with sample drop off at CVS.

Intended use:

- to collect a nasal swab for purpose of in vitro diagnostic testing in a CLIA laboratory.

Rx only
