

**FDA Staff Manual Guides, Volume I - Organizations and Functions**

**Department of Health and Human Services**

**Food and Drug Administration**

**Center for Drug Evaluation and Research**

**Office of New Drugs**

**Office of Immunology & Inflammation**

**Division of Pulmonology, Allergy & Critical Care**

Effective Date: September 25, 2019

**1. Division of Pulmonology, Allergy & Critical Care (DCDGCE).**

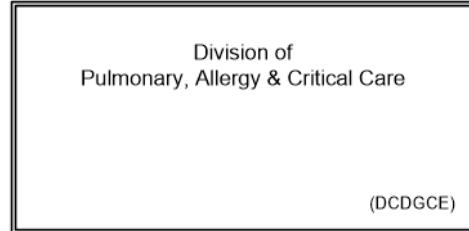

- A. Reviews Investigational New Drugs and requests for claimed investigational exemption for pulmonology, allergy, and critical care products and decides on appropriate regulatory action. Develops policies and procedures pertinent to particular aspects of investigation of drugs and biologics.
- B. Evaluates New Drug Applications (NDAs) and Biologic License Applications (BLAs) for safety and effectiveness and formulates decisions or recommendations regarding approvability in accord with applicable regulations/statutes. Evaluates supplements that propose changes in the conditions upon which NDA/BLA approvals are based. Develops regulatory and scientific policies and procedures applicable to the review and evaluation of drugs and biologics for pulmonology, allergy, and critical care products.
- C. Evaluates adequacy of information in proposed labeling for pulmonology, allergy and critical care products.
- D. Evaluates and takes appropriate action on recommendations concerning withdrawal of approval of NDAs and BLAs for pulmonology, allergy, and critical care products.
- E. Provides advice and information to other components of the Center and to the Food and Drug Administration (FDA) on pulmonary, allergy, and critical care drug products with regard to medical and scientific issues, status of drug and biologics applications, appropriate policy, and proposed regulatory actions.

- F. Utilizes the advisory committee process to obtain advice on product safety and effectiveness. Participates in FDA sponsored consumer and professional educational programs on drug standards.
- G. Develops, in coordination with other FDA components, guidance for staff, sponsors and the public that describes the FDA's interpretation of or policy on regulatory issues that involve pulmonology, allergy, and critical care products.
- H. Performs medical and scientific evaluations of submissions on generic drugs, drugs under monograph, and Over-the-Counter drug products regulated by other offices in the Center, as applicable.
