Why is getting a flu shot more important this season than ever?

Flu viruses and the virus that causes COVID-19 will spread this fall and winter. There is a flu shot available right now that will protect you against the flu.

Why should you get a flu shot?

We know flu shots reduce the risk of flu illness, hospitalization, and death. It won't protect you from COVID-19, but keeping you healthy from the flu will ensure medical care and resources are available for COVID-19 patients.

When is the best time to get a flu shot?

NOW! is the best time to get a flu shot before the flu begins spreading in your community. It takes about two weeks after receiving the flu shot for antibodies to develop in the body and provide protection.
