

# FINDING OF NO SIGNIFICANT IMPACT

## Marketing Orders for

### Black and Mild® Blues Wood Tip and Black and Mild® Blues

#### Manufactured by John Middleton Co.

The Center for Tobacco Products of the Food and Drug Administration (FDA) has carefully considered the potential environmental impacts of these actions and has concluded that these actions will not have significant effects on the quality of the human environment. Therefore, environmental impact statements are not required.

John Middleton Co. wishes to introduce two new unfiltered, sheet wrapped cigars into interstate commerce for commercial distribution in the United States and submitted to FDA two substantial equivalence reports to obtain marketing orders under the provisions of sections 910 and 905(j) of the Federal Food, Drug, and Cosmetic Act.

The Agency prepared the programmatic environmental assessment (PEA), dated July 20, 2020, in accordance with the Council on Environmental Quality's regulations (40 CFR Part 1500–1508) implementing the National Environmental Policy Act (NEPA) and FDA's NEPA regulations (21 CFR 25.40) to support the finding of no significant impact. The evidence supporting this finding is contained in the attached PEA, which is available to the public upon request.

The PEA evaluates potential environmental effects due to manufacturing, use, and disposal of the new tobacco products. No increased or new types of environmental impacts due to manufacturing the new tobacco products are anticipated. The Agency does not foresee that use of the new tobacco products would result in new or different environmental impacts. The Agency believes that the disposal of the new tobacco products is the same as the disposal conditions of other unfiltered sheet wrapped cigars that are currently marketed in the United States. Therefore, the Agency does not foresee adverse impacts to the environment due to the proposed actions as a result of manufacturing, use, and disposal of the new tobacco products.
