

Return Instructions

Double check that you registered your sample at everlywell.com/register and added the ID sticker with your information to the sample tube.

1

Wash your hands

Wash your hands thoroughly with soap and water for 20 seconds.

2

Get return box ready

Assemble the box (insert flaps or pop open) and close one end.

3

Prepare sample

Place your biohazard bag inside the box. The box provides extra protection during transit.

4

Put box in mailer

With clean hands, place the shipping box into the prepaid mailer. Apply the shipping label to the front of the mailer. **Do not cover the UN3373 label.**

5

Alcohol prep pad

Disinfect the mailer

Use the provided alcohol prep pad to disinfect the mailer, avoiding the address label, before completing the final shipping step.

6

Ship

Deliver the pre-paid, pre-addressed return pack to a UPS drop box. It's important you drop off your sample on the **same day you collect before the last pickup** for overnight shipping. **Do not deliver sample to a drop box on the weekend.**

IS-EW-CVD19-003

This product has not been FDA cleared or approved, but has been authorized for emergency use by FDA under an EUA. This product has been authorized only for the home collection and maintenance of nasal swab specimens as an aid in detection of nucleic acid from SARS-CoV-2, not for any other viruses or pathogens. The emergency use of this product only authorized for the duration of the declaration that circumstances exist justifying the authorization of emergency use of medical devices under Section 564(b)(1) of the Federal Food, Drug and Cosmetic Act, 21 U.S.C. § 360bbb-3(b)(1), unless the declaration is terminated or authorization is revoked sooner.

Important Reminder

Be sure to complete these 3 steps before mailing your kit.

Register kit

Fill out kit ID sticker

Same day ship

Visit www.everlywell.com/register and complete your registration.

The lab **can only** process your sample if you:

- Register your sample at everlywell.com/register
- Fill out ID sticker and place it on your sample tube
- Ship sample the same day you collect (Monday-Friday)

Sample Collection Instructions

Please follow all instructions closely to ensure proper precautions are taken for packaging and sending COVID-19 samples to our collection labs. Make sure you can ship the same day you collect.

1

Register

You must register your kit at everlywell.com/register before you collect. Do not register until you are ready to collect your sample because you will be asked to enter your time of collection. Collect Monday-Friday as samples cannot be shipped on the weekend. The lab cannot process your sample if this step is missed.

2

Watch video

For best results, watch our collection video at everlywell.com/collect before you start.

3

Locate UPS drop box

Visit the UPS website to view drop box locations and pick up schedules. **Plan to collect and drop off your sample to the drop box on the same day (Monday-Friday) before the last pickup.** Shipping materials are under the green box.

4

Fill out kit ID sticker

Place ID sticker on the collection tube. Do not cover the barcode sticker already on the tube. Using a ballpoint pen or fine tip permanent marker, write your full name, date of birth, and the date of collection. Your information **must** match what you used to register your kit. **Do not pour the liquid out of the tube.**

5

Prep space and wash hands

Disinfect surfaces where you will be completing your test. Blow your nose. Then thoroughly wash your hands with soap and water for 20 seconds prior to collection.

6

Prepare to collect

Before inserting the swab, locate the perforation on the swab (near the tip) as you will need this after you collect your sample. Then tilt your head back to approximately a 45 degree angle.

7

Insert nasal swab

Hold the swab below the perforation line. Gently and slowly insert the swab into your nostril, **about 1 inch** until gentle resistance is met.

8

Collect swab sample

Rotate the swab 3 times all the way around the nasal wall with a slight pressure. Remove swab. **Repeat this process in the other nostril using the same swab.**

9

Place the swab sample in the tube

Place the swab sample (tip down) in the tube without spilling the liquid. Break the swab at the perforated line (near the tip) and leave in tube. **Tightly seal cap.** Liquid volume may not completely cover the swab tip.

10

Place tube into bag

Place tube into protective biohazard bag with the absorbent sheet. **Follow return instructions on the reverse.**
