**WARNINGS**

Individuals exhibiting severe COVID-19 warning symptoms are not allowed to proceed with kit registration and instead directed to seek emergency medical care.

This product has not been FDA cleared or approved but has been authorized by FDA under an Emergency Use Authorization for use by Tempus Laboratories located at 600 W Chicago, Ste 510, Chicago, IL 60654, which is certified under CLIA and meets the requirements to perform high complexity tests.

This product is only authorized for the detection of nucleic acid from SARS-CoV-2, not for any other viruses or pathogens.

The emergency use of this product is only authorized for the duration of the declaration that circumstances exist justifying the authorization of emergency use of in vitro diagnostic for detection and/or diagnosis of COVID-19 under Section 564(b)(1) of the Federal Food, Drug and Cosmetic Act, 21 U.S.C. § 360bb-3(b)(1), unless the declaration is terminated or authorization is revoked sooner.

Federal law restricts this device to be sold by or on the order of a licensed practitioner.

The Tempus Nasal Sample Collection Kit is intended for 18 years old or older individuals to self-collect anterior nares specimen unsupervised at home when determined to be appropriate by their healthcare provider.
PRE-COLLECTION

1) Visit the FedEx website at fedex.com/labreturns to view drop box locations and pickup schedules. 
• Your sample should be shipped the same day that you collect it. Make sure you are able to get to your drop box before the last pickup time on the same day you collect your sample. 
• Do not deliver your sample to a drop box on the weekend.

2) Open test kit on a clean surface.

3) Identify your sample transport tube. 
• Using a permanent pen, write your date of birth (MM-DD-YY) on the enclosed label.
• Remove the adhesive backing from the label/sticker and affix it to the sample transport tube. 
• Note: Do not write on or cover up the printed barcode or 9 digit ID number on the tube.

4) Activate your Tempus kit at activate.tempus.com. 

5) Prepare the sample transport tube by tapping the tube gently and ensure the liquid is at the bottom. 
• Unseal the cap from the sample transport tube and place it on the table.

6) Wash your hands thoroughly for 20 seconds with soap and water before collecting your sample. 

7) Insert the soft tip of the swab into one nostril, until the tip of the swab is no longer visible. 
• Rotate the swab four times in a circular motion around the entire inside edge of the nostril then keep it in place for 15 seconds. 
• Repeat the same process in the other nostril using the same swab.

8) Activate your Tempus kit at activate.tempus.com. 

9) Place the swab (tip first) into the sample transport tube. 
• Tip of swab will be in the liquid. 
• Leave the swab inside the tube. 
• If the swab is too long to fit inside the tube, break the swab handle against the side of the tube at its perforated break point. Discard the top portion of the swab.

10) Screw the cap onto the sample transport tube until it is closed tightly. 

11) Confirm that the sample transport tube is tightly closed and has your date of birth on the transport tube.

COLLECTING YOUR SAMPLE

12) Place the sample transport tube in the Biohazard specimen bag and seal the bag tightly. 

13) Make sure to leave the absorbent sheet inside the biohazard specimen bag.

14) Wipe the outside of the bag with the provided alcohol pad. Dispose of wipe. 

15) Place the biohazard specimen bag into the Tempus-labeled box. 

16) Remove the adhesive liner of the FedEx UN 3373 Pak and press down firmly to seal the Pak tightly. 

RETURNING YOUR SAMPLE

17) Drop off UN 3373 Pak with shipping label at the nearest FedEx Drop Box (see item 1 for locations). 
• Please drop off your sample on the same day you collect it and before the last pickup time. 
• Do not deliver your sample to a drop box on the weekend.

18) Confirm that the sample transport tube is tightly closed and has your date of birth on the transport tube.

19) Place the sample transport tube in the biohazard specimen bag and seal the bag tightly. 

20) Make sure to leave the absorbent sheet inside the biohazard specimen bag.

21) Wipe the outside of the bag with the provided alcohol pad. Dispose of wipe. 

22) Place the biohazard specimen bag into the Tempus-labeled box. 

23) Remove the adhesive liner of the FedEx UN 3373 Pak and press down firmly to seal the Pak tightly. 

YOU'RE ALL SET. 

After your sample has been dropped off at FedEx, your order will be processed once received.
