Vaccine Ready Social Media Toolkit

Over the last year, the COVID-19 pandemic has highlighted the health inequities that affect certain communities within the United States, specifically racial and ethnic minority groups. Many of these communities have particularly been disproportionately impacted by COVID-19. The FDA's Office of Minority Health and Health Equity has joined the U.S. Department of Health and Human Services' #VaccineReady campaign to address these disparities. We've developed social media messages to encourage members of diverse communities to get vaccinated against COVID-19. In this toolkit, you will find Twitter and Facebook messages with a variety of graphics and videos on topics such as vaccine development, vaccine authorization, and the benefits of getting vaccinated against COVID-19.

We encourage diverse communities to:

- Get the facts about COVID-19 vaccines.
- Share accurate vaccine information.
- Participate in clinical trials.
- Get vaccinated when the time comes.
- Practice COVID-19 safety measures.

As more vaccines become available, there are steps communities can take to protect themselves until they can get vaccinated. Be sure to:

- Wear a mask to protect yourself and others and stop the spread of COVID-19.
- Wash your hands often with soap and water for at least 20 seconds.
- Stay at least 6 feet (about 2 arm lengths) from others who don't live with you.
- Avoid crowds. The more people you are in contact with, the more likely you are to be exposed to COVID-19.
