Let's get started!
Please read all of the instructions before beginning collection.

Register
When you are ready to collect your sample, register your kit by scanning the above QR code, and typing in the 12 digit registration code that is located on the registration card, collection tube, and biohazard bag sticker.

Prepare for shipping
Visit https://bit.ly/fedexdropbox to view FedEx drop box locations and pickup schedules. It's important to bring your sample to a drop box on the same day you collect it before the last Express pickup.

Open the test kit.
Place all the contents on a clean, dry surface. Items needed for collection:
- Single Tip Swab
- Collection Tube With VTM with Label
- BioHazard Bag with Label
- UN3373 FedEx LabPak Bag

Blow your Nose
Taking a tissue and blowing your nose. Wipe the exterior of your nose ONLY, do not wipe the inside of your nose. Dispose of tissue.

Uncap the tube
Unscrew the top of the collection tube. Place the cap face up on a clean surface. Stand the open tube on a clean surface so the liquid does not spill. Do not drink the liquid.

Unwrap the Swab
Take the swab out of its package. Do not touch the tip of the swab with your hands. Do not place the swab on any surface.

Insert Swab into Tube
Remove the swab from your second nostril and while holding the collection tube place the end of the flocked side of the swab into the tube. Screw the top of the collection tube back on.

Swab 1st Nostril
Insert the tip of the swab into the left nostril, insert just until the tip of the swab is no longer visible. Rotate the swab in a circle around the entire inside wall of your nostril at least 10 times.

Swab 2nd Nostril
Using the same end of the same swab repeat in the right nostril. Rotate the swab in a circle around the entire inside wall of your nostril at least 10 times.

Pack/Prepare Your Sample
Place tube inside specimen bag. Do not remove the absorbent pad. Seal the specime bag.

Before you Prepare for Ship
Wash and dry hands after collecting your sample.
