I registered the kit. If you have not registered the kit, go back to section 1.

I collected a sample from both nostrils. The nasal swab only touched the inside of the nostrils.

I did not spill the fluid in the collection tube. Put tube inside the plastic bag. Put the capped collection tube inside the plastic bag with the absorbent pad. Release excess air from the bag and seal it shut.

Clean the sample collection surface area with a disinfectant. Prepare the box for return shipping. The return box must be used to ship your sample to the lab. Check your box to make sure corners are not damaged and sides have no tears or holes.

Put your sealed plastic bag with your collection tube in the box. Close box and seal with tape. Drop off the box with your sample at a UPS location on the same day. Collect and drop off Monday - Friday due to UPS shipping schedules.

Before registering your kit and collecting your sample, confirm the last air drop off time at http://www.ups.com/dropoff. Eligible location types include The UPS Store®, UPS Drop Box or UPS Customer Center. UPS Access Point locations do not guarantee next day delivery.

If you miss any testing steps, results may be inaccurate or result in an error. If you have missed steps please discard kit components and clean your area. Get a new kit at your earliest convenience by visiting AmazonDx.com/FAQs.

Before sending the sample to the lab
- If you cannot check all of the boxes below, the sample cannot be processed.

Send sample to lab
- For individuals under 18 years old, an adult should assist with packaging and UPS drop off.

Put tube inside the plastic bag. Put the capped collection tube inside the plastic bag with the absorbent pad.

Release excess air from the bag and seal it shut. Do not remove the absorbent pad from the plastic bag.

Prepare the box for return shipping. The return box must be used to ship your sample to the lab. Check your box to make sure corners are not damaged and sides have no tears or holes.

Put your sealed plastic bag with your collection tube in the box. Close box and seal with tape.

Drop off the box with your sample at a UPS location on the same day. Collect and drop off Monday - Friday due to UPS shipping schedules. Before registering your kit and collecting your sample, confirm the last air drop off time at http://www.ups.com/dropoff.

Eligible location types include The UPS Store®, UPS Drop Box or UPS Customer Center. UPS Access Point locations do not guarantee next day delivery.

Expire samples cannot be processed. If your sample is expired you will receive a notification of error.

Please collect and drop off Monday - Friday due to UPS shipping schedules. Before registering your kit, confirm the last air drop off time at http://www.ups.com/dropoff.

Expired samples cannot be processed.

Visit AmazonDx.com
Using your personal device, visit AmazonDx.com or view the QR code with your camera app. Sign in or create an account.

1. Register your kit
   1. Watch the overview video during the kit registration process. (Revisit the video at AmazonDx.com/FAQs)
   2. Visit AmazonDx.com
      a. Using your personal device, visit AmazonDx.com or view the QR code with your camera app.
      b. Sign in or create an account.

2. Collect your sample
   a. We recommend testing while seated.
   b. If you are collecting the sample for a child, explain the process step-by-step in advance so they know what to expect.
   c. Do not touch the soft tip of the swab.
   d. Do not touch or drink the fluid in the collection tube.
   e. If the fluid touches eyes or skin, rinse with water.
   f. If you spill the fluid or the swab touches any surface other than inside the test taker’s nostrils, discard the kit components. Clean the area with your usual household surface disinfectant, and get a new kit by visiting AmazonDx.com/FAQs.

   a. Do not put the fluid in the collection tube! If you spill the fluid, clean the area and discard your kit components.

   1. Swab first nostril
      a. For individuals 14 years or older, insert the soft tip of the swab ½ - ¾ inch inside the nostril.
      b. For children 2–13 years old, insert the swab no more than ½ inch.
      c. Rub the swab in a slow circular motion against the inside walls of the nostril at least 4 times. This should take about 15 seconds.
      d. Do not touch the soft tip of the swab to any surface other than inside the test taker’s nostrils.
      e. Do not spill the fluid in the collection tube! If you spill the fluid, clean the area and discard your kit components.
      f. Repeat in other nostril
         a. In the other nostril using the same swab, rub the swab slowly at least 4 times taking about 15 seconds.
         b. Do not touch the soft tip of the swab to any surface other than inside the test taker’s nostrils.

   2. Wash and dry hands
      a. Wash your hands with soap and warm water for 20 seconds.
      b. Use hand sanitizer if there is no sink.
      c. Clean the surface of the area where the sample will be collected.

3. Remove the lid from the collection tube
   a. Recap the collection tube.
   b. Make sure the lid is on a clean surface. Do not touch the lid top facing down.

4. Open the swab pouch
   a. Peel back the tab on the handle end to remove the nasal swab from the pouch.
   b. Hold by the handle, do not touch the soft tip.
   c. Discard the swab pouch.
   d. Do not touch the soft tip of the swab to any surface other than inside the test taker’s nostrils.

5. Put the swab in collection tube soft tip down
   a. Put the swab in the tube so the soft tip reaches the bottom.
   b. If you feel resistance, stop.

6. Recap the collection tube
   a. Make sure the lid is on tight, so no fluid can spill out. If the collection tube leaks your sample cannot be processed.
   b. Wash your hands or use hand sanitizer if there is no sink.

Components:
- Nasal swab
- Collection tube with saline
- Biohazard plastic bag with absorbent pad
- Return box with shipping label
- Tape
- Fact sheet for individuals (not pictured)
Amazon COVID-19 Test Collection Kit DTC

How it works
Purchase your kit. Register the kit at AmazonDx.com by entering your personal information and collection tube ID. Follow the instructions found in your kit to collect your anterior nasal sample and ship it to the lab via UPS. Once your test is processed you will receive an email and text message with a link to your results.

As needed, follow up with your healthcare provider.
