I registered the kit.

If you have not registered the kit, go back to section 1.

I collected a sample from both nostrils.

The nasal swab only touched the inside of the nostrils.

I did not spill the fluid in the collection tube.

Put tube inside the plastic bag

Put the capped collection tube inside the plastic bag with the absorbent pad.

Release excess air from the bag and seal it shut.

Clean the sample collection surface area with a disinfectant.

Prepare the box for return shipping

The return box must be used to ship your sample to the lab.

Before registering your kit and collecting your sample, confirm the last air drop off time at http://www.ups.com/dropoff

Eligible location types include The UPS Store®, UPS Drop Box or UPS Customer Center. UPS Access Point locations do not guarantee next day delivery.

If you miss any testing steps, results may be inaccurate or result in an error. If you have missed steps please discard kit components and clean your area. Get a new kit at your earliest convenience by visiting AmazonDx.com/FAQs.

If you cannot check all of the boxes below, the sample cannot be processed.

1 Collect your sample

We recommend testing while seated.
If you are collecting the sample for a child, explain the process step-by-step in advance so they know what to expect.
Do not touch the soft tip of the swab.
Do not touch or drink the fluid in the collection tube.
If the fluid touches eyes or skin, rinse with water.
If you spill the fluid or the swab touches any surface other than inside the test taker’s nostrils, discard the kit components. Clean the area with your routine household surface disinfectant, and get a new kit by visiting AmazonDx.com/FAQs.

Put the swab in the tube so the soft tip reaches the bottom.
To break off the swab handle, hold the tube firmly. Bend the swab handle at the indicator line back and forth against the collection tube until it breaks.
Discard the handle.
Do not touch the soft tip of the swab to any surface other than inside the test taker's nostrils.

2 Register your kit

Promptly enter the collection tube ID, found on the side of the collection tube.

3 Open the swab pouch

Peel back the tab on the handle and remove the nasal swab from the pouch.
Hold by the handle, do not touch the soft tip.
Discard the swab pouch.
Do not touch the soft tip of the swab to any surface other than inside the test taker’s nostrils.

Repeat in other nostril
In the other nostril, using the same swab, rub the swab slowly at least 4 times taking about 15 seconds.

Swab first nostril
For individuals 14 years or older, insert the soft tip of the swab ½ - ¾ inch inside the nostril.
For children 2-13 years old, insert the swab no more than ½ inch.

Put swab in collection tube soft tip down
Put the swab in the tube so the soft tip reaches the bottom.

Wash and dry hands
Wash your hands with soap and warm water for 20 seconds.
Use hand sanitizer if there is no sink.
Clean the surface of the area where the sample will be collected.

Recap the collection tube
Make sure the lid is on tight, so no fluid can spill out. If the collection tube leaks your sample cannot be processed.
Wash your hands or use hand sanitizer if there is no sink.

Collect the sample immediately after registering.

The kit must be registered to get results.

Register kit

Collect your sample

Enter the collection tube ID

Confirm the test taker’s personal information online. Then enter the collection tube ID, found on the side of the collection tube.

Press “Register kit”
Collect the sample immediately after registering.

The kit must be registered to get results.

Swab first nostril
For individuals 14 years or older, insert the soft tip of the swab ½ - ¾ inch inside the nostril.
For children 2-13 years old, insert the swab no more than ½ inch.
Rub the swab in a slow circular motion against the inside walls of the nostrils at least 4 times.
This should take about 15 seconds.

If collecting a sample from a child, a helpful way to hold the swab for into the child’s nostril, if you feel resistance, stop.

Repeat in other nostril
In the other nostril, using the same swab, rub the swab slowly at least 4 times taking about 15 seconds.

Put swab in collection tube soft tip down
Put the swab in the tube so the soft tip reaches the bottom.

Open the swab pouch

Peel back the tab on the handle and remove the nasal swab from the pouch.
Hold by the handle, do not touch the soft tip.
Discard the swab pouch.
Do not touch the soft tip of the swab to any surface other than inside the test taker’s nostrils.

Repeat in other nostril
In the other nostril, using the same swab, rub the swab slowly at least 4 times taking about 15 seconds.
