I registered my kit.

If you have not registered your kit please go back to section 1.

I collected a sample from both nostrils.

The nasal swab only touched my nostrils.

I did not spill the fluid in the collection tube.

I put tube inside the plastic bag

Put the capped collection tube inside the plastic bag with the absorbent pad. Release excess air from the bag and seal it shut.

Clean the sample collection surface area with a disinfectant.

Do not remove the absorbent pad from the plastic bag.

Prepare your box for return shipping

The return box must be used to ship your sample to the lab.

Check your box to make sure corners are not damaged and sides have no tears or holes.

Put your sealed plastic bag with your collection tube in the box. Close box and seal with tape.

Drop the box with your sample off at a UPS location within 24 hours.

Drop your sample off at UPS within 24 hours. Before collecting your sample, confirm the last air drop off time at http://www.ups.com/dropoff. Please note only The UPS Store®, UPS Drop Box or UPS Customer Center locations can accept samples.

If you miss any testing steps your results may be inaccurate or result in an error. If you have missed steps please discard kit components and clean your area. Get a new kit at your earliest convenience by visiting AmazonDx.com/FAQs.
Before you start

Carefully read all instructions before you begin. Sample collection takes less than 10 minutes.

The return box must be used to ship your sample to the lab. Make sure corners are not damaged and sides have no tears or holes. If damaged, discard and get a new kit by visiting AmazonDx.com/FAQs.

Drop your sample off at UPS within 24 hours. Expired samples cannot be processed. Due to weekend shipping schedules, we recommend collecting and shipping your sample Monday - Friday.

If the fluid touches your eyes or skin, rinse with water. If you spill the fluid or the swab touches any surface other than inside your nostrils discard your kit components. Clean the area with your routine household surface disinfectant, and get a new kit by visiting AmazonDx.com/FAQs.

Register your kit

Watch the overview video during the kit registration process. Watch the video at: AmazonDx.com/FAQs

Visit AmazonDx.com

Using your personal device, visit AmazonDx.com or view the QR code with your camera app. Sign in or create an account.

Enter the collection tube ID

Confirm your personal information online. Then enter the collection tube ID, found on the side of your collection tube.

Press “Register kit”

Collect your sample immediately after registering. You must register your kit to get results.

Collect your sample

We recommend testing while seated.

Do not touch the soft tip of the swab.

Do not touch or drink the fluid in the collection tube.

If the fluid touches your eyes or skin, rinse with water.

If you spill the fluid or the swab touches any surface other than inside your nostrils discard your kit components. Clean the area with your routine household surface disinfectant, and get a new kit by visiting AmazonDx.com/FAQs.

Remove the lid from the collection tube

Put the tube lid on a clean surface nearby, with the lid top facing down.

Put the collection tube in the tube holder provided in the box to avoid spilling fluid.

Open the swab pouch

Peel back the tab on the handle end to remove the nasal swab from the pouch. Hold by the handle, do not touch the soft tip. Discard the swab pouch.

Do not touch the soft tip of the swab to any surface other than inside your nostrils.

Wash and dry your hands

Wash your hands with soap and warm water for 20 seconds.

Use hand sanitizer if there is no sink.

Clean the surface of the area where you will collect your sample.

Swab first nostril

Insert the soft tip of the swab ½ - ¾ inch inside your nostril. Rub the swab in a slow circular motion against the inside walls of your nostril at least 4 times. This should take about 15 seconds.
