

## Bamlanivimab and Etesevimab Authorized States, Territories, and U.S. Jurisdictions

Document Date: October 27, 2021

Bamlanivimab and etesevimab, administered together, are not authorized for use in states, territories, and U.S. jurisdictions in which the most recently published combined frequency of variants resistant to bamlanivimab and etesevimab exceeds 5%.

Based on the most currently available data, bamlanivimab and etesevimab are now authorized in all U.S. states, territories, and jurisdictions as listed in Table 1.

FDA determines the list of authorized states, territories and U.S. jurisdictions considering [current variant frequency data](#), trends in variant frequency over time, the precision of the estimates and information regarding emerging variants of concern. FDA will update the list of states, territories, and U.S. jurisdictions in which bamlanivimab and etesevimab administered together are authorized as new data and information becomes available. Health care providers should refer to this webpage regularly for updates.

Health care providers should review a patient's travel and contact history within two weeks prior to infection. People who have traveled to, resided in, or had close contact with an infected individual from an area where the frequency of resistant variants to bamlanivimab and etesevimab exceeds 5% should not receive bamlanivimab and etesevimab.

Health care providers should also refer to Section 15 of the [Fact Sheet for Health Care Providers](#) for further details regarding specific variants and resistance.

**Table 1: States, Territories, and U.S. Jurisdictions in which Bamlanivimab and Etesevimab Are Currently Authorized for Use**

Alabama
Alaska
American Samoa
Arizona
Arkansas
California
Colorado
Commonwealth of the Northern Mariana Islands
Connecticut
Delaware
District of Columbia
Federated States of Micronesia
Florida
Georgia
Guam
Hawaii
