Hello I am (b)(6) other son. I wanted to add a few things for my mom. She was rushed to the hospital last year for blood loss and needed 3 bags of blood with zero reasons of lost that blood we know now why she is so sick can you please recall these hips my mother almost lost her life already and now learning the cobalt crosses over the blood brain barrier it is extremely important to help get it out before any more damage is done she has also been suffering all the other symptoms we lost our dad to a drunk driver now we are losing her to something that can be stopped and these doctors can stop pushing her to the next one

please help us

Hello

I didn't think there would ever be a day for the FDA to finally realize what I am going through everyday. My mother was a energetic healthy woman 4 years ago and now she is dying from Cobalt poisoning. I have taken her to local doctors on up to the specialists in Philadelphia and none of them will help her. Unless these hips are recalled she will die and I live with this fight daily trying to save my mom. She is not the woman mentally or physically she was how is this allowed to continue without no help from our own government. Your poison levels are not sufficient enough for the mental damage my mother is going through. Please recall these hips and save my mothers life.

She can't even get vaccinated not knowing would the combination be lethal? No one can answer that so only way to save millions of people with implants that you know already are deadly can you please recall them my mother trusted the doctors and government to get it right the first time can you at least make it right now

thanks
