The Flowflex Web App allows you to track and report your COVID-19 test results:

- The Web App is optional and not required. It will assist you in interpreting your visual test result and report your result to local health authorities.
- Ensure you have an internet connection and scan the Flowflex QR code or go to流www.flowflexcovid.com prior to starting the test.
- Ensure you are using a compatible web browser (Chrome, Firefox, Edge, or Safari) and your electronic device has a camera.
- Click on "Report Your Test Result".
- Create an account.

To perform a COVID-19 test:
1. Log in to the Flowflex Web App - Ensure you are connected to the internet during your test.
2. Answer any few questions on the Web App.
4. Read result.

PREPARATION
1. Wash or sanitize your hands. Make sure they are dry before starting the test.
2. Read the instructions.
3. Check your kit contents and make sure you have everything. Check the expiration date printed on the cassette foil pouch. Do not use if the pouch is damaged or open.

TEST PROCEDURE
1. Remove the foil from the top of the extraction buffer tube.
2. Punch through the perforated circle on the box to form a tube holder. Place the tube in the tube holder. For 25 test quantity kit box the tube holder is provided.
3. Open the pouch and lay the cassette on a clean, flat surface. Locate the Result Window and Sample Well on the cassette.
4. Gently insert the entire absorbent tip of the swab into 1 nostril (½ to ¾ of an inch). With children, the maximum depth of insertion into the nostril may be less than ⅔ of an inch, and you may need to have a second person to hold the child’s head while swabbing.
Note: A false negative result may occur if the nasal swab specimen is not properly collected.

RESULT INTERPRETATION
If the Control (C) line is visible, the test is positive. You do not need to perform repeat testing if you have a positive result at any time.
If the Control (C) line and the Test (T) line are visible, the test is positive. Any faint visible red or pink test (T) line with the control line (C) should be read as positive. You do not need to perform repeat testing if you have a positive result at any time.
A positive test result means that the virus that causes COVID-19 was detected in your sample and it is very likely you have COVID-19 and are contagious. Please contact your doctor/primary care physician or your local health authority immediately and adhere to the local guidelines regarding self-isolation. There is a very small chance that this test can give a positive result that is incorrect (a false positive).

If the Control (C) line is not visible, the test is invalid. Re-test with a new swab and new test cassette.
If the problem persists, call (800) 838-9502 for assistance.
COVID-19 can be found at days five and may need additional tests to perform this serial (repeat) testing. A: If your test is positive, then proteins from the virus that causes COVID-19 have been found in your sample and both your COVID-19 and initial negative results should be treated as every 48 hours between tests. Do not use nasal sprays for at least 30 minutes before collecting a nasal sample. If applicable, keep test kit and kit components away from children and pets before and after use. Store Flowflex COVID-19 Antigen Home Test at room temperature. This means that there is an increased chance of false negative results with antigen tests than with laboratory-based molecular tests due to the sensitivity of the test technology. This test has not been used for at least 90 minutes after collecting a nasal sample. Do not use any person under 2 years of age. This test has not been validated for use with a video camera and faint bands may not be visible to a technician due to differences in equipment. This test is intended for non-prescription self-use and/or as applicable, by individuals who are prone to nosebleeds or have had facial injuries or head injuries/surgery in the past 90 days. False negative test results may occur if a specimen is incorrectly collected or handled. If the reagent solution contacts the skin, eyes, nose, or mouth, flush with large amounts of water. If you have symptoms of COVID-19, your first test result is negative, you should test again after 48 hours, if possible, or if you are working with or caring for someone who has COVID-19 and was infected more than 24 hours ago. Do not use the test after the expiration date shown on the test cassette. Do not use any of the test kit contents or packaging is damaged or open. If applicable, keep test kit and kit components away from children and pets before and after use. Please visit: www.flowflex.com. A: The results of this test may help limit the spread of COVID-19 to your family and others in your community. A: COVID-19 may have no symptoms or symptoms that are easily ignored, such as fever, cough, and/or shortness of breath may still have SARS-CoV-2 infection and should seek follow up care from their healthcare provider. Tests that are used for the diagnosis of SARS-CoV-2 nucleic acid protein antigen, which is generally detectable in nasal (noses) samples during the acute phase of infection. Positive results indicate the presence of SARS-CoV-2 virus within respiratory tract and not necessarily mean that person is infectious. Keep all test kit and kit components away from children and pets before and after use. This test is not intended to be used as an aid in diagnosis for the presence of active COVID-19. Do not use this test as the only guide to manage your illness. Please consult your healthcare provider if your symptoms persist or worsen. This test was obtained with this product to their healthcare provider for public health reporting. The performance of this test is based on the evaluation of a limited number of clinical specimens using this assay. Nucleic acid tests are now established for all circulating variants but is anticipated to be reflective of the prevalent variants circulating in the United States at the time of testing. If you have symptoms of COVID-19 and receive a negative result, you should test at least two more times with 48 hours in between tests for a total of three tests. This test is intended for non-prescription self-use and/or as applicable, by individuals who are prone to nosebleeds or have had facial injuries or surgery in the past 90 days. This test is intended for non-prescription self-use and/or as applicable, by individuals who are prone to nosebleeds or have had facial injuries or surgery in the past 90 days. This test is intended for non-prescription self-use and/or as applicable, by individuals who are prone to nosebleeds or have had facial injuries or surgery in the past 90 days. This test is intended for non-prescription self-use and/or as applicable, by individuals who are prone to nosebleeds or have had facial injuries or surgery in the past 90 days.流鼻主要症状包括鼻塞, 鼻涕, 咳嗽和喉咙痛。但是, 某些人可能有轻微的或没有症状。
COVID-19 Antigen Home Test

**Flowflex**

1 Test

If you have symptoms of COVID-19, you may need to test at least twice over these three days with at least 24 hours between tests. If you do not have symptoms of COVID-19, you may need to test at least three times over seven days with at least 24 hours between tests. A negative test result does not mean that you will never test positive. You may choose to purchase additional tests to perform serial rapid testing.

This test does NOT determine if you had COVID-19 in the past if you have symptoms. This test is a rapid test for current infection. It is not a substitute for PCR testing. A negative test result does not mean that you will never test positive. You may choose to purchase additional tests to perform serial rapid testing.

This product has been authorized only for the detection of proteins from SARS-CoV-2, not for any other viruses or pathogens.

The emergency use of this product is only authorized for the duration of the declaration of public health emergency pursuant to Section 1254 of the Public Health Emergency Preparedness Act of 2006 (42 U.S.C. 248d-3). After the declaration is terminated or authorization is revoked, this authorization is not in effect.

**Contents:**
- 1 Test Cassette
- 1 Instructional Booklet (For Nasal Swab)
- 1 Disposable Nasal Swab (For Nasal Swab)
- 1 Package Insert (Spanish)

For nasal swab users, see the package insert for use information.
