Janssen COVID-19

recombinant, replication-incompetent adenovirus type 26 expressing the SARS-CoV-2 spike protein, citric acid monohydrate, trisodium citrate dihydrate, ethanol, 2-hydroxypropyl-β-cyclodextrin (HBCD), polysorbate-80 sodium chloride H
Janssen COVID-19 (a single dose)
Janssen COVID-19:

- Guillain Barré

Guillain Barré (GB) is a neurological complication that may be observed after receiving the vaccine. It is characterized by muscle weakness and sensory changes, which can progress to paralysis. GB typically occurs within days to weeks after vaccination, with a peak incidence at 3 to 7 days. The reported incidence is less than 1 case per million doses administered.
