

BsUFA Performance Dashboard User Guide

Navigation and Relevant Information

The [BsUFA Performance Dashboards](#) are organized into four categories: 1) Biosimilar Applications and Supplements; 2) Procedural Notifications; 3) Procedural Responses; and 4) Meeting Management. Each category includes a Current and Historical Performance Dashboard with a navigation menu and icons at the top of each dashboard. The menu and icons include information to:

1. BsUFA Current Performance Dashboards for each category showing the two most recent years of performance for each goal
2. BsUFA Historical Performance Dashboards for each category showing the historical performance for each goal
3. FDA-TRACK Drugs Home Page
4. FDA-TRACK Biologics Home Page
5. BsUFA Dashboard User Guide
6. FDA-TRACK Home Page
7. Relevant Links about BsUFA
8. General background about BsUFA

Current Performance

The Current Performance page of the BsUFA Performance Dashboard shows the two most recent years of performance for each established goal, and the most recent year of performance for newly implemented goals established under BsUFA II. When more than one year of data is reported, the first year's data is final, and the second year's data is preliminary with some actions still pending.

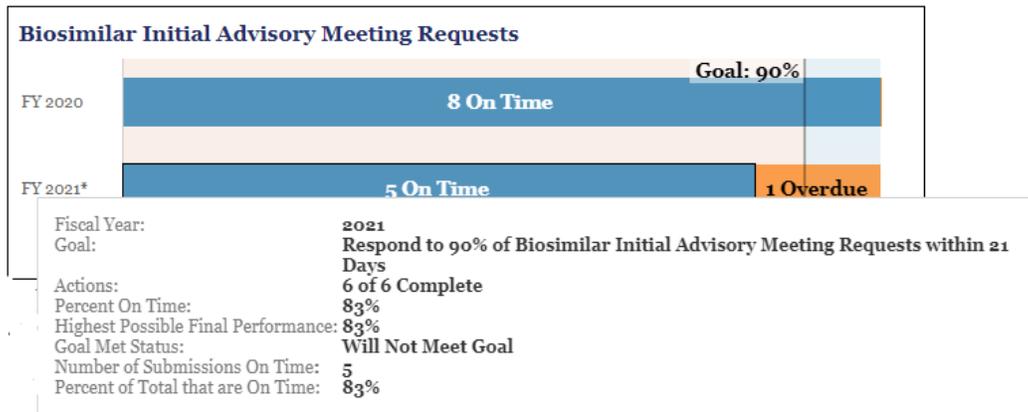

The Current Performance page displays a stacked bar chart for each year of performance:

- The color of each segment of the bar represents status:
 - Blue represents actions completed “On Time,” or within goal;
 - Gray represents actions “Pending,” or within goal and where no action has been taken;
 - Orange represents actions “Overdue,” where action was taken after the goal date, or no action was taken and is past the goal date.
- Each bar is labeled with the number of actions in that status, except in cases where the volume of actions with that status is extremely small. In some instances, the label for the review status will not display in the graph due to space. This is an automatic default setting in the visualization software. If you hover the cursor over the section of the graph where the label is missing, the label details will appear in the Tooltip.
- The “Performance Goal” is shown as a solid vertical line on the graph:
 - If the blue bar reaches the performance goal line from the left, the goal status is “Goal Met,” or “Will Meet Goal.”
 - If the gray bar crosses the performance goal line, the goal status is “Currently Meeting, Pending.”
 - If the orange bar reaches the performance goal line from the right, the goal status is “Goal Not Met” or “Will Not Meet Goal.”

In the example below, 52 meeting minutes were taken in FY 2020. Of those meeting minutes, 88% (46) met the performance goal, while 12% (6) did not. Since the orange bar reaches to the left of the performance goal line, the status of that goal is “Goal Not Met.” In FY 2021, 68 meeting minutes were taken; 56% (38) were on time, 13% (21) was still pending, and 13% (9) were overdue. Again, since the orange bar reaches the performance goal line, the status of that goal is also “Goal Not Met.”

To see a Tooltip that displays additional information, hover the cursor over each status on a bar, as shown in the example below.

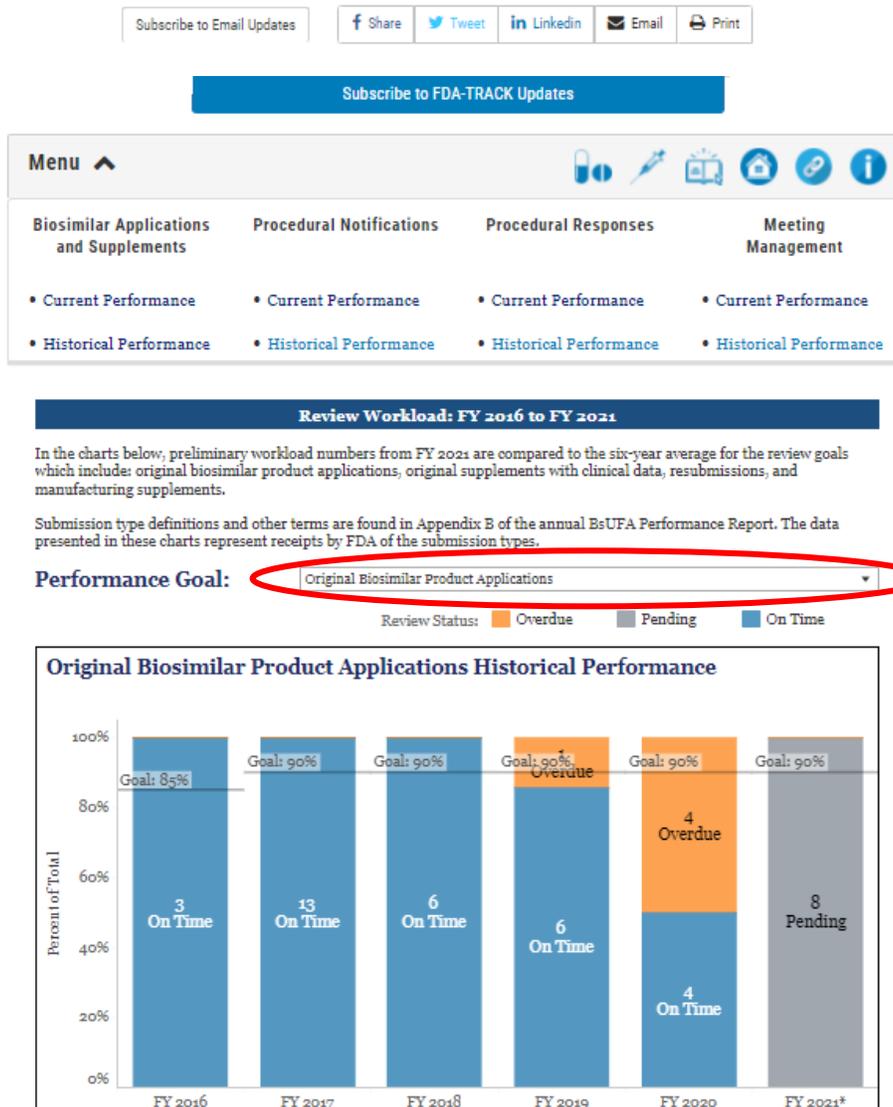

The Tooltip provides several useful pieces of information. These include:

- Fiscal Year: The Fiscal Year of the receipt of the submission subject to the goal.
- Goal: The performance goal, type of action, and review time of the goal.
- Actions:
 - For final data, the number of actions out of the total that were on time.
 - For preliminary data, the number of actions that are completed, regardless of whether they were on time or overdue, out of all potential actions.
- Percent on Time: The percent of actions that met the goal.
- Highest Possible Performance: The highest performance that can be achieved if all “Pending” within goal submissions are acted upon within goal.
- Goal Met Status: The statuses are “Goal Met,” “Will Meet Goal,” “Currently Meeting, Pending,” “Will Not Meet Goal,” or “Goal Not Met.”
- Number of Submissions: For a specified status, the number of submissions included in that status.
- Percent of Total: For a specified status, the percentage portion of submissions in relation to the total (100%).

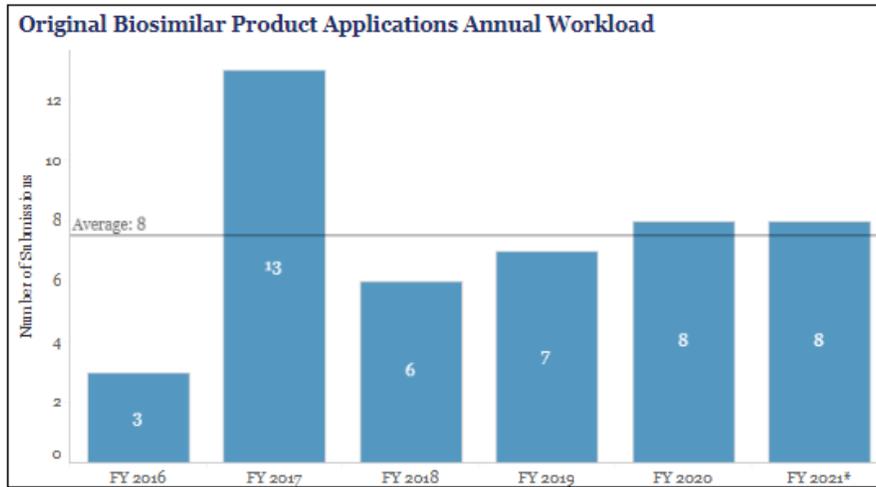

Historical Performance

The Historical Performance page of the BsUFA Performance Dashboard shows the past six years of data for each performance goal. The past five years of data are final and the past year of data, which may include newly implemented goals, is preliminary with actions still pending. The Performance Goal Filter above the chart allows for the selection of a goal as seen in the example below.

FDA-TRACK: BsUFA Historical Performance: Biosimilar Applications and Supplements

Workload data represents the number of submissions subject to the specific goals during the biosimilar review process. The “average” line through the graph represents the average number of submissions over the five-year period of final performance data, excluding preliminary data.

Datasets and Footnotes

The data in each dashboard can be downloaded by selecting the dataset button below each dashboard, as shown below for the Current Performance for the BsUFA Meeting Management Dashboard.

Download BsUFA Meeting Management Dataset

Footnotes are provided below each dashboard showing relevant information, for example, noting whether there were changes in the performance goals, or whether data is preliminary.

Footnotes:

* Performance is currently preliminary due to pending submissions.

** New Performance Goal for BsUFA II (see [Changes for this Goal](#), pages 22-24)
