

Dr. Uboha is an Associate Professor at the University of Wisconsin, Department of Medicine, Division of Hematology and Oncology and a member of Carbone Cancer Center. She has significant clinical research experience, with a particular emphasis on phase 1 and biomarker based clinical studies for patients with gastrointestinal malignancies. She is a faculty leader for Cancer Therapy Discovery & Development (Phase I) Program. She is a co-leader and founder of the Basket Disease Oriented Team (DOT) at UW, which has a specific focus on biomarker based trials across disease types, and which has an ongoing collaboration with Molecular Tumor Board, of which Dr. Uboha is also an active member.

Dr. Uboha has a number of regional and national leadership roles. She serves on the board of Wisconsin Association of Hematology and Oncology. She is a co-chair for GI Cancer Research Group in Big 10 Cancer Research Consortium. She is an active member of ECOG working groups and is a national chair for a phase 3 ECOG clinical study (EA2183), which evaluates the role of consolidative radiation therapy in oligometastatic esophagogastric adenocarcinoma. She also serves on National Cancer Institute Upper GI Task force as an ECOG representative.
