### **Availability Update for ADD-Vantage™ Flexible Containers (Multiple Presentations)**

Dear Customer,

Pfizer Hospital is committed to providing timely supply information so that you can plan for patient care. As such, we want to update you regarding an ongoing limited supply and intermittent stockout situation for **Dextrose Injection 5%, USP and Sodium Chloride Injection 0.9%, USP ADD-Vantage™ Flexible Containers** through Q3 2022.

These products have been in limited supply for several months as a result of a complex combination of challenges including significant increases in demand, isolated manufacturing delays, and COVID-19 related staffing and colleague safety considerations.

The impacted presentations are detailed in the table below. All products in which the supply status is noted as “Depleted” will not be available until the next delivery date. To ensure equitable distribution of inventory to our ADD-Vantage customers, we are releasing limited quantities of product to the market on a weekly basis and allocating order fulfillment in accordance with historical purchasing patterns. At this time, the Sodium Chloride Injection 0.9%, USP 250 mL ADD-Vantage™ Flexible Container will remain available for direct purchase only.

<b>NDC</b>	<b>Product Description</b>	<b>Product Status as of 4/18/22</b>	<b>Next Delivery</b>	<b>Estimated Recovery</b>
