CURRENT MONTH ADDS/DELETES LIST NOTE:

The List is sorted by Ingredient(s) and, within each grouping, by the Dosage Form; Route and then by trade name.

The individual product record contains the Therapeutic Equivalence Code, Reference Listed Drug symbol, Reference Standard Drug symbol, applicant holder, strength(s), New Drug Application number, product number, and approval date. The last two columns describe the action. The Action Month is the CS month the action occurred. The OB Action is the type of change that has occurred.

New ingredient(s), new dosage form; route(s), new trade names, and new product additions are preceded by >A> during the action month. The change month is the current CS month; the change code for new approvals is NEWA.

Changes to currently listed products will list two records. The deleted product record will be preceded by >D>. The product record change addition being made will be preceded by >A>.

The change code description:

NEWA New drug product approval usually in the supplement month.
NFTG New first time generic approval.
CAHN** Applicant holder firm name has changed.
CAIN Change. There has been a change in the Ingredient(s) name. All products will be deleted under the old name and all products will be added under the changed ingredient(s) name.
CDFR Change. Dosage Form; Route of Administration.
CFTG Change. A first time generic for the innovator product. A TE Code is added.
CMFD Change. The product is moved from the Discontinued Section due to a change in marketing status.
CMKT Change. RX to OTC marketing status switch.
CMS1 Change. Miscellaneous addition to list.
CMS2 Change. Miscellaneous deletion from list.
CPOT Change. Potency amount/unit.
CRLD Change. Reference Listed Drug.
CHRS Change. Reference Standard.
CTEC Change. Therapeutic Equivalence Code.
CTNA Change. Trade Name.
DISC Discontinued. The Rx or OTC listed product is not being marketed and will be moved to the discontinued section in the next edition.

**Note:

The Cumulative Supplement (CS) currently displays a condensed 20 character collapsed applicant holder firm name and the Electronic Orange Book (EOB) query may display up to a 240 character full applicant holder firm name. An applicant holder firm name change usually changes both the collapsed name and long name. On occasion, only the long name is changed resulting in the CS displaying only the collapsed name for the >D> and >A> action. The new firm long name will display in the EOB query.
