Panel Discussion:
Opportunities for Effective Collaboration in the Supply Chain

Moderator: Michelle Tarver, MD, PhD
Deputy Director, Office of Strategic Partnerships and Technology Innovation
Program Director for Patient Science, Digital Health Center of Excellence
Center for Devices and Radiological Health, Food & Drug Administration
Collaboration is Essential

*RSCP needs support and collaboration from stakeholders to build resilience*

Supply chain intelligence is a multi-stakeholder endeavor

Ultimately, industry owns the supply chains, but many others are impacted by those decisions

Many stakeholders play a role in the sustainability of the supply chain

Inclusion, collaboration, and reciprocity are key
Supply Chain Complexity

*Effective collaboration is essential given the complexity of the supply chain*

<table>

Our success depends on our ability to collaborate and engage with experts across the medical device ecosystem.
Collaboration Needed for RSCP

Addressing shortages and building resiliency requires more than just sharing data

Operational Insights → Data → Tools + Best Practices → Reciprocal Information Sharing → Mitigations

Resilience Building → Coordinated Action
Examples of Collaboration Mechanisms

*FDA CDRH participates in many collaboration mechanisms established to bring stakeholders together*

1. Collaborative Communities
2. Patient + Caregiver Connection
3. Network of Experts
4. Partnership + Other Agreements
