Statement of Work

The U.S. Food and Drug Administration’s (FDA), The Food and Drug Administration (FDA) is responsible for protecting the public health by assuring the safety, efficacy, and security of human and veterinary drugs, biological products, medical devices, our nation’s food supply, cosmetics, and products that emit radiation. The FDA is also responsible for advancing the public health by helping to speed innovations that make medicines and foods more effective, safer, and more affordable, and helping the public get the accurate, science-based information they need to use medicines and foods to improve their health.

The mission of the Center for Devices and Radiological Health (CDRH) is to protect and promote the public health. CDRH assures that patients and providers have timely and continued access to safe, effective, and high-quality medical devices and safe radiation-emitting products. We provide consumers, patients, their caregivers, and providers with understandable and accessible science-based information about the products we oversee. We facilitate medical device innovation by advancing regulatory science, providing industry with predictable, consistent, transparent, and efficient regulatory pathways, and assuring consumer confidence in devices marketed in the U.S.

The Office of Science and Engineering Laboratories (OSEL) supports the CDRH mission of protecting and promoting public health. OSEL undertakes the highest quality science to provide our customers with the best methods, tools and expertise to:

- Ensure readiness for emerging and innovative medical technologies
- Develop appropriate evaluation strategies and testing standards
- Create accessible and understandable public health information and,
- Deliver timely and accurate decisions for products across their life cycle.

Through a culture of customer first, communication, collaboration and consultancy, the Division of Imaging, Diagnostics and Software Reliability (DIDSR) participates in the Center's mission of protecting and promoting public health by identifying and investigating issues related to medical imaging, computer-assisted diagnostics, and software reliability. The division accomplishes this through activities supporting the OSEL mission.

Under the FDA's guidance, this collaboration between OSEL and DIDSR requires the purchase of a multi-angle spectrophotometer (MAS) to ensure center and agency-wide maximum, scientific research capacity. An MAS allows for the spectral measurement of object surface from different angles such that the measurement data can be used in augmented reality or virtual reality (AR/VR) devices to create realistic representation in medical applications. The MAS is required for measuring spectral reflectance of object surface from different angles. The multi-angle measurement data is required to reconstruct the virtual objects for the AR/VR devices to present the virtual scene from different angles corresponding to the viewer's movement.

The laboratory has identified an MAS instrument that meets its requirements: the X-Rite MA5-QC Multi-Angle Spectrophotometer (MAS), or equal instrument.

Instrument Salient Characteristics/General Requirements:

1. The MAS must measure a spectral range between 400 nm and 700 nm or wider. The spectral resolution must be 10 nm or higher (finer).
2. The MAS measures from 45° or more angles.
3. The MAS illuminates from at least 5 different angles including 45°.
4. The measurement repeatability must be less than 0.03 delta-E.
5. The measurement reproducibility must be less than 0.1 delta-E.
6. Each measurement needs to be completed within 3 seconds.
7. The MAS must have memory to store previous measurement data.
8. The MAS must be portable, and battery powered.
9. The MAS can be periodically calibrated internally and/or externally.

Training and Additional System Requirements:

1. The components and equipment shall be a newly manufactured, not used or refurbished, or previously used for demonstration.
2. Instrument shall be warranted for not less than one (1) year from FDA acceptance, to include training. Warranty service shall include troubleshooting capabilities based on complete knowledge of the entire system, immediate access to replacement parts, and immediate access to system improvements and updates. Phone and email technical support

shall be included for a minimum of one (1) year.

3. The instrument shall be delivered with all necessary supplies and accessories required for installation and start-up.
4. The instrument shall include operations and maintenance manuals covering proper operation, routine maintenance, and troubleshooting for the instrument and controlling software. All manuals and documentation shall be provided in hard copy and/or electronic format.

Deliverables: Service Records and Reports: The Contractor shall, commensurate with the completion of each service, provide the end-user of the equipment with a copy of a field service report/ticket identifying the equipment name, manufacturer, model number, and serial number of the equipment being serviced, a detailed description of the work performed, the test instruments or other equipment used to perform the service, the name(s) and contact information of the technician who performed the service, and for information purposes, the hours expended, and parts/components replaced. In addition, the Contractor shall provide a written report to the FDA COR and Contract Specialist, summarizing all maintenance activities (including warranty work) each time service is performed.

The solicitation document and incorporated provisions and clauses are those in effect through Federal Acquisition Circular (FAC) 2022-06 effective May 26, 2022.

The associated North American Industry Classification System (NAICS) code for this acquisition is 334516 – Analytical Laboratory Instrument Manufacturing; the applicable Small Business Size Standard is 1,000 employees. FDA Attestation and COVID-19 Testing Screening Procedures for Onsite Work at an FDA Facility

On April 22, 2022, HHS posted a notice to SAM.gov outlining procedures for access control regarding onsite contractor attestation of vaccination or evidence of negative COVID-19 test results and can be found here: <https://sam.gov/opp/b85251f1555c40dfae55adf651e18f5a/view>. The notice outlines the use of the Contracting Officer Representative (COR)/Technical Point of Contact (TPOC) or his/her designee to facilitate this process.

FDA has developed a process that should be followed in FDA facilities based upon medium or high COVID-19 Community Levels in an area.

The COR/TPOC or Designee should validate compliance prior to any Contractor or visitor reporting on-site at an FDA facility.

Similar to FDA's face covering/mask policy, each individual is responsible for checking the current CDC COVID-19 Community Level for their respective FDA facility and implementing this compliance check for contractors who will be working on-site if the facility CDC COVID-19 Community Level is Medium or High.

The Contractor shall maintain a copy of either their Certification of Vaccination form or result of a negative COVID-19 test within the last 72 hours and must always have it available with them to present to the COR/TPOC or Designee upon request.

Onsite Contractors who are not yet fully vaccinated, unvaccinated, or decline to disclose their vaccination status and who are unable to show proof of a negative test within the last 72 hours, may be asked to leave the facility. The COR/TPOC or Designee shall then notify their Contracting Officer (CO) that this action was taken.

(h) *Certification Regarding Responsibility Matters (Executive Order 12689)*. (Applies only if the contract value is expected to exceed the simplified acquisition threshold.) The offeror certifies, to the best of its knowledge and belief, that the offeror and/or any of its principals—

(1) Are, are not presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contracts by any Federal agency;

(2) Have, have not, within a three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a Federal, state or local government contract or subcontract; violation of Federal or state antitrust statutes relating to the submission of offers; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, violating Federal criminal tax laws, or receiving stolen property;

(3) Are, are not presently indicted for, or otherwise criminally or civilly charged by a Government entity with, commission of any of these offenses enumerated in paragraph (h)(2) of this clause; and
 (4) Have, have not, within a three-year period preceding this offer, been notified of any delinquent Federal taxes in an amount that exceeds the threshold at [9.104-5\(a\)\(2\)](#) for which the liability remains unsatisfied.

(i) Taxes are considered delinquent if both of the following criteria apply:

(A) *The tax liability is finally determined.* The liability is finally determined if it has been assessed. A liability is not finally determined if there is a pending administrative or judicial challenge. In the case of a judicial challenge to the liability, the liability is not finally determined until all judicial appeal rights have been exhausted.

(B) *The taxpayer is delinquent in making payment.* A taxpayer is delinquent if the taxpayer has failed to pay the tax liability when full payment was due and required. A taxpayer is not delinquent in cases where enforced collection action is precluded.

(ii) *Examples.*

(A) The taxpayer has received a statutory notice of deficiency, under I.R.C. §6212, which entitles the taxpayer to seek Tax Court review of a proposed tax deficiency. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek Tax Court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(B) The IRS has filed a notice of Federal tax lien with respect to an assessed tax liability, and the taxpayer has been issued a notice under I.R.C. §6320 entitling the taxpayer to request a hearing with the IRS Office of Appeals contesting the lien filing, and to further appeal to the Tax Court if the IRS determines to sustain the lien filing. In the course of the hearing, the taxpayer is entitled to contest the underlying tax liability because the taxpayer has had no prior opportunity to contest the liability. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek tax court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(C) The taxpayer has entered into an installment agreement pursuant to I.R.C. §6159. The taxpayer is making timely payments and is in full compliance with the agreement terms. The taxpayer is not delinquent because the taxpayer is not currently required to make full payment.

(D) The taxpayer has filed for bankruptcy protection. The taxpayer is not delinquent because enforced collection action is stayed under 11 U.S.C. §362 (the Bankruptcy Code).

(i) *Certification Regarding Knowledge of Child Labor for Listed End Products (Executive Order 13126).* [The Contracting Officer must list in paragraph (i)(1) any end products being acquired under this solicitation that are included in the List of Products Requiring Contractor Certification as to Forced or Indentured Child Labor, unless excluded at [22.1503\(b\).](#)]
