Kit contains everything needed to run one test: instructions, collector, cap, sensor, and nasal swab for optional use.

Easy
You choose - saliva or swab

Metrix is a PCR-accurate molecular test to diagnose or screen for COVID-19 infection. For use with or without symptoms or other reasons to suspect COVID-19. For self-testing by individuals aged 14+, and by adult users testing other individuals aged 2+.

Single use only. No prescription required. Read instructions before using. Keep out of reach of children. Do not ingest any part of this test kit.

Start Here

Carefully read all instructions before beginning.
No food/drink (including water/oral hygiene products) for 30 minutes before test.
Complete the entire procedure without delay between steps.
Metrix Reader required. Available separately.

Contents

Materials required to run one test:
Sensor
Cap
Collector
Nasal Swab (optional)

Scan QR code for interactive instructions and a video demonstration

Insert sensor into reader until it cannot go further.
The test will begin automatically and will take 30 minutes.

Power Up
Connect reader to power supply. The center light will turn solid white (not flashing) when ready.

Saliva Collection
Deposit a small amount of saliva into the collector.

Choose one preferred sample method:
Saliva or Nasal Swab

DO NOT OVERFILL

Nasal Swab Collection
Insert the nasal swab into your nostril until the tip is fully inside. Stop when you meet resistance (about 1 inch for adults, ½ inch for children).
Roll the swab against the inside of your nostril 5 times.

Firmly insert the swab into collector until it cannot go any further.
Snap off and discard the swab handle.

Shake to Mix
Shake the collector very hard for 20 seconds to mix.

DO NOT SHAKE THE OPENINGS OR THE CAP.

CLICK

CHECK THAT BLACK LINES ARE VISIBLE THROUGH THE OPENINGS ON THE CAP.

Shake the collector very hard for 20 seconds to mix.

Make sure that your sample is mixed well.

Remove the black plastic cover from the bottom of the collector.
Insert the sensor into the collector until it clicks and fluid enters the sensor.

PRESS FIRMLY TO LOCK IN PLACE

Put the cap on the collector and press down firmly until the cap clicks into place.

Press firmly to lock in place.

Insert sensor into reader until it cannot go any further.
The test will begin automatically and will take 30 minutes.

Firmly insert the sensor into the collector until it clicks and fluid enters the sensor.

Press firmly to lock in place.

Snack off and discard the swab handle.

Run the Test

CONFORM THAT THE READER IS READY. THE CENTER LIGHT WILL BE SOLID (NOT FLASHING).
Insert sensor into reader until it cannot go further.
The test will begin automatically and will take 30 minutes.

Read Your Results

Use the following visual signifiers to note the results of the test:
Solid purple = Invalid
Repeat test with a new kit.
Solid red = COVID Positive SARS-CoV-2 was present.
Solid green = COVID Negative SARS-CoV-2 was not present.

IF PROOF OF TEST IS NEEDED, TAKE A PHOTO OF YOUR RESULT.
THE RESULT WILL DISPLAY UNTIL THE SENSOR IS REMOVED.

Insert sensor into reader until it cannot go any further.
The test will begin automatically and will take 30 minutes.

DO NOT DISMANTLE.

For use under Emergency Use Authorization (EUA) only.

Metrix COVID-19 Test Instructions

UG-00005 Ver 2, p. 3 of 7
Meaning of Results

A negative test result indicates that SARS-CoV-2, the virus that causes COVID-19, was not detected in your sample. However, it is possible for this test to give a negative result that is not correct (false negative) in some people with COVID-19. Negative results do not preclude SARS-CoV-2 infection and should not be used as the sole basis for treatment of an individual, including infection control decisions. If you have symptoms, contact a healthcare provider for additional testing.

A positive test result indicates that SARS-CoV-2, the virus that causes COVID-19, was detected in your sample. It is very likely that you have COVID-19. Positive test results do not rule out bacterial infection or co-infection with other viruses. Individuals who test positive with the Metrix COVID-19 Test should self-isolate and seek follow-up care with a healthcare professional as additional testing may be necessary.

The Metrix COVID-19 Test detects active COVID-19 infections and does not test for previous infections.

After Your Test

To report your Metrix COVID-19 Test results to public health agencies, please visit: aptitudemetrix.com/publichealth/reporting

If symptoms persist or if you are concerned about your health, please seek follow-up care from a healthcare provider.

Reader Statues

Starting Up
The reader is starting up. Wait until the center light is solid white before inserting a sensor.

Ready
The reader is ready to start a test.

Test Running
The reader is running a test. Do not remove the sensor or unplug the reader.

Positive Result
The test is complete and SARS-CoV-2 was detected in the sample.

Negative Result
The test is complete and SARS-CoV-2 was not detected in the sample.

Indicates flashing light
If troubleshooting fails to resolve any problem, please contact support. In the event that your Metrix Reader needs to be disposed of, please place in electronic waste.

Troubleshooting

Invalid Result
The test is complete and the result is invalid. Repeat with a new Metrix COVID-19 Test kit.

Test Error
Remove sensor and firmly press down on collector. Firmly reinsert sensor into reader. If error persists, discard sensor and use a new test kit.

Canceled Test
The test did not complete. Discard the sensor and run the test with a new Metrix COVID-19 Test Kit.

Test Running
The test did not complete. Discard the sensor and run the test with a new Metrix COVID-19 Test Kit.

No Power
Check all electrical connections. The reader is not receiving power.

Hardware Failure
There is an error with the reader. Disconnect and reconnect the power.

Intended Use

The Metrix™ COVID-19 Test (Metrix) is a single-use molecular in vitro diagnostic test for the qualitative detection of nucleic acid from SARS-CoV-2, the virus that causes COVID-19. This test is authorized for non-preservation home use with anterior nasal (nares) swab specimens, self-collected from any individual aged 2 years or older, or adult-collected from any individual aged 14 years or older, to determine infection status. This test is not intended for use with respiratory specimens, including individuals without symptoms or other epidemiological reasons suspect COVID-19.

The test is complete and the result is invalid. Repeat with a new Metrix COVID-19 Test kit.

No Power
Check all electrical connections. The reader is not receiving power.

Hardware Failure
There is an error with the reader. Disconnect and reconnect the power.

If troubleshooting fails to resolve any problem, please contact support. In the event that your Metrix Reader needs to be disposed of, please place in electronic waste.

Warnings/Precautions

For in vitro diagnostic use only. Do not use if kit is damaged.

This product has not been FDA cleared or approved, but has been authorized for emergency use by FDA under EUA.

This product has been authorized only for the detection of nucleic acid from SARS-CoV-2, not for any other viruses or pathogens.

For current EUA status, please visit: https://www.fda.gov/emergency-preparedness-and-response/mcm-legal-regulatory-and-policy-framework/emergency-use-authorization

Some statements or conclusions in this kit or package insert are the views of the individual authors and do not necessarily reflect the views of the U.S. Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 360aa-3(b)(1), unless the declaration is terminated or authorization is revoked sooner.

The Metrix COVID-19 Test and Metrix Reader are for FDA Emergency Use Authorization (EUA) Only.

This test is complete and the result is invalid. Repeat with a new Metrix COVID-19 Test kit.

No Power
Check all electrical connections. The reader is not receiving power.

Hardware Failure
There is an error with the reader. Disconnect and reconnect the power.

If troubleshooting fails to resolve any problem, please contact support. In the event that your Metrix Reader needs to be disposed of, please place in electronic waste.

Potential risks of this test include: (1) Possible incorrect test results. Potential benefits of this test include: (2) Possible correct test results.
Kit contains: one reusable Metrix reader, quick start guide, power adapter, and USB-C power cable.

This product is for use with test-specific Metrix kits. Go to www.aptitudemetrix.com for a list of all compatible devices.
Start Here

Warnings and Precautions
- Do not use components that are visibly damaged.
- The Metrix Reader can be cleaned by wiping the exterior with disinfectant. Do not spray disinfectant into or onto the reader.
- If a power failure occurs or if the Metrix Reader is unplugged while the Sensor is inserted, the test result is invalidated. The test should be redone with a new test kit.
- Use only the provided power cable and power adapter.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

For in vitro diagnostic use
This product has not been FDA cleared or approved, but has been authorized for emergency use by FDA under an EUA.

The emergency use of this product is only authorized for the duration of the declaration that circumstances exist justifying the authorization of emergency use of in vitro diagnostics for detection and/or diagnosis of COVID-19 under Section 564(b)(1) of the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. § 360ee-b(3)(B), unless the declaration is terminated or authorization is revoked sooner.

The Metrix COVID-19 Test and Metrix Reader are for FDA Emergency Use Authorization (EUA) only.
