Emergency Syringe Availability Update

Dear Customer,

In August 2022, Pfizer Hospital provided an update on supply constraints impacting the emergency syringe portfolio due to increased demand and isolated manufacturing delays. Given ongoing market shortages of these products, demand continues to outpace capacity. As such, the purpose of this letter is to share the latest estimated next delivery and recovery dates, included in the table below.

Please recognize that this is a dynamic situation and these estimates may change, so we encourage you to check our [Availability Report](#), updated daily and accessible on the [PfizerHospitalUS.com](#) homepage, for the latest information on product status. We will continue to provide timely updates as necessary.
